FORWARD - LOOKING STATEMENTS

This Draft Prospectus contains certain “forward-looking statements”. These forward-looking statements generally can be identified by words or phrases such as “aim”, “anticipate”, “believe”, “expect”, “estimate”, “intend”, “objective”, “plan”, “propose”, “project”, “will”, “will continue”, “will pursue” or other words or phrases of similar import. Similarly, statements that describe our strategies, objectives, plans or goals are also forward-looking statements. All forward-looking statements are subject to risks, uncertainties, expectations and assumptions about us that could cause actual results to differ materially from those contemplated by the relevant forward-looking statement. These forward-looking statements, whether made by us or a third party, are based on our current plans, estimates and expectations and actual results may differ materially from those suggested by such forward-looking statements.

Actual results may differ materially from those suggested by forward-looking statements due to risks or uncertainties associated with expectations relating to and including, regulatory changes pertaining to the industries in India in which we operate and our ability to respond to them, our ability to successfully implement our strategy, our growth and expansion, technological changes, our exposure to market risks, general economic and political conditions in India which have an impact on its business activities or investments, the monetary and fiscal policies of India, inflation, deflation, unanticipated turbulence in interest rates, foreign exchange rates, equity prices or other rates or prices, the performance of the financial markets in India and globally, changes in domestic laws, regulations and taxes and changes in competition in the industries in which we operate.

Certain important factors that could cause actual results to differ materially from our Company’s expectations include, but are not limited to, the following:

- Substantial portion of our revenues are dependent on few customers and the loss of, or a significant reduction in purchases by any one or more such customers could adversely affect our financial performance
- Our dependence on few suppliers puts us at risk of interruptions in the availability of raw materials, which could adversely affect our business, financial condition and results of operations. Further, we have not entered into any long-term agreements with our suppliers for raw materials and accordingly may not be able to enjoy credit and other facilities provided by our existing suppliers.
- We may be unable to obtain, renew or maintain statutory and regulatory permits, licenses and approvals required to operate our business which could result in an adverse effect on our results of operations. We require certain statutory and regulatory permits, licenses and approvals for our business.
- The non-availability or high cost of quality gold bullion and coloured stones may have an adverse effect on our business, results of operations and financial condition.
- Our income and sales are subject to seasonal fluctuations and lower income in a peak season may have a disproportionate effect on our results of operations.

For further discussion of factors that could cause the actual results to differ from our estimates and expectations, see “*Risk Factors*”, “*Our Business*” and “*Management’s Discussion and Analysis of Financial Position and Results of Operations*” beginning on pages 23, 107 and 189, respectively, of this Draft Prospectus. By their nature, certain market risk disclosures are only estimates and could be materially different from what actually occurs in the future. As a result, actual gains or losses could materially differ from those that have been estimated.

We cannot assure investors that the expectations reflected in these forward-looking statements will prove to be correct. Given these uncertainties, investors are cautioned not to place undue reliance on such forward-looking statements and not to regard such statements as a guarantee of future performance.

Forward-looking statements reflect current views as of the date of this Draft Prospectus and are not a guarantee of future performance. These statements are based on our management’s beliefs and assumptions, which in turn are based on currently available information. Although we believe the assumptions upon which these forward-looking statements are based are reasonable, any of these assumptions could prove to be inaccurate, and the forward-looking statements based on these assumptions could be incorrect. Neither our Company, our Directors, the Promoters, the Syndicate nor any of their respective affiliates have any obligation to update or otherwise revise any statements reflecting circumstances arising after the date hereof or to reflect the occurrence of underlying events, even if the underlying assumptions do not come to fruition.

In accordance with the SEBI ICDR Regulations, our Company, the Promoters and the Lead Managers will ensure that the Bidders in India are informed of material developments until the time of the grant of listing and trading permission by the Stock Exchange for the Issue.

1. Summary of Industry

Global growth is projected at 3.1 percent in 2024 and 3.2 percent in 2025, with the 2024 forecast 0.2 percentage point higher than that in the October 2023 World Economic Outlook (WEO) on account of greater-than- expected resilience in the United States and several large emerging market and developing economies, as well as fiscal support in China. The forecast for 2024–25 is, however, below the historical (2000–19) average of 3.8 percent, with elevated central bank policy rates to fight inflation, a withdrawal of fiscal support amid high debt weighing on economic activity, and low underlying productivity growth. Inflation is falling faster than expected in most regions, in the midst of unwinding supply-side issues and restrictive monetary policy. Global headline inflation is expected to fall to 5.8 percent in 2024 and to 4.4 percent in 2025, with the 2025 forecast revised down.

In the coming years, growth in the gems and jewellery sector would largely be contributed by the development of large retailers/brands. Established brands are guiding the organised market and are opening opportunities to grow. Increasing penetration of organised players provides variety in terms of products and designs. Also, the relaxation of restrictions on gold import is likely to provide a fillip to the industry. The improvement in availability along with the reintroduction of low-cost gold metal loans and likely stabilisation of gold prices at lower levels is also expected to drive volume growth for jewellers over the short to medium term. India has 450 organised jewellery manufacturers, importers & exporters and is the hub for jewellery manufacturing. These players have benefited greatly due to the increasing liberal policies by the government. The demand for jewellery is expected to be significantly supported by the recent positive developments in the industry. India’s gems and jewellery industry is expected to reach US\$ 100 billion by 2027.

For further details, please refer to the chapter titled “*Industry Overview*” on page 91 of this Draft Prospectus.

Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and, in the section titled “Forward-Looking Statements” on page 16 of this Draft Prospectus.

INTERNAL RISK FACTORS

BUSINESS RELATED RISKS

1. ***Substantial portion of our revenues are dependent on few customers and the loss of, or a significant reduction in purchases by any one or more such customers could adversely affect our financial performance.***

We currently derive our entire operational revenues from sale of gold and silver jewellery in the domestic market. We depend on a limited number of customers for a significant portion of our revenues. The table below sets forth a break-up of the revenue earned by our Company from top ten customers during the preceding three years and six month period ended September 30, 2024:

(₹ in lakhs)

Particulars	September 30, 2024		Fiscal 2024		Fiscal 2023		Fiscal 2022	
	Amount	Percentage (%)	Amount	Percentage (%)	Amount	Percentage (%)	Amount	Percentage (%)
Top 10 customers	13,068.40	96.11%	17,502.72	95.51%	21,436.89	86.98%	10,120.75	71.07%

Any perceived decline in our quality standards, growing competition and any change in demand may adversely affect our ability to retain or acquire customers and consequently affect our financials. We cannot assure that we shall generate the same quantum of business, or any business at all from our top customers, and any loss of business from one or more of them may adversely affect our revenues and results of operations. Also, the composition and revenue generated from each of the customers might change as we continue to add new customers in the normal course of business. While we are constantly striving to increase our customer base and reduce dependence on any particular customer, there is no assurance that we will be able to broaden our customer base in any future periods or that our business or results of operations will not be adversely affected by a reduction in demand or cessation of our relationship with any of our major customers.

2. ***Our dependence on few suppliers puts us at risk of interruptions in the availability of raw materials, which could adversely affect our business, financial condition and results of operations. Further, we have not entered into any long-term agreements with our suppliers for raw materials and accordingly may not be able to enjoy credit and other facilities provided by our existing suppliers.***

Our Company is mainly engaged in the manufacture and sale of gold jewellery in various designs and styles. Our main raw material is 24 karat gold, which is procured in the form of Gold bars of 500 gms each or in the form of Gold Biscuits of 100 gms each. This standard Gold Bullion is our primary raw material and is purchased in bulk from various bullion traders. We also use ancillary raw materials like Silver, different mixes of Alloy and various Coloured Stones. Silver is mainly used to create a basic sample of each jewellery design created by our designing team. This sample is used for display to our customers and also to ascertain the actual look, style and viability of the design before making the final gold jewellery of that design. Alloy is used in small quantities, mainly for the purpose of mixing with gold so as to convert 24 karat gold into 22 karat gold, thus giving the gold jewellery a sturdier make.

Though we prefer to deal with a fixed set of suppliers with whom we have cordial relationships, we have not entered into any supply agreement or MoU or any other arrangement with any of our suppliers for procurement of our raw material and we typically transact on an invoice basis for each order. Besides Gold, we use ancillary raw materials like Silver, different mixes of alloy, Various coloured stones, which are also procured on invoice bases. The table below sets forth a break-up of the top ten suppliers during the preceding three years and the six month period ended September 30, 2024:

Particulars	September 30, 2024		Fiscal 2024		Fiscal 2023		Fiscal 2022	
	Amount	Percentage (%)	Amount	Percentage (%)	Amount	Percentage (%)	Amount	Percentage (%)
Top 10 suppliers	11,937.87	87.93%	17,013.36	94.17%	21,793.87	90.80%	12,246.73	87.01%

These suppliers have accorded their trust and service based on our long operating history in the industry, our credit worthiness, and our goodwill. We have very frequent transactions, long history and goodwill with some of our suppliers. However, in the absence of written agreements, our suppliers are not bound to supply goods to us and can withdraw their commitments from us at any time. There can be no assurance that there will not be a significant disruption in the supply of raw materials from current sources, or, in the event of a disruption, that we would be able to locate alternative suppliers of the raw materials of comparable quality on terms acceptable to us, or at all. Identifying a suitable supplier involves a process that requires us to become satisfied with their quality control, consistency, responsiveness and service, financial stability and other ethical practices. In case any of our suppliers discontinue their relationship with us, we may have to procure the raw materials from other locations leading to additional costs on transportation. Also, we cannot assure that our raw material supply will not face disruption due to increased lead time for supply of raw materials leading to either disruption in our manufacturing activity or a complete stopping of the same. If we are unable to maintain our relationship with our current raw material suppliers it may prove difficult to obtain the same from other players.

- 3. We may be unable to obtain, renew or maintain statutory and regulatory permits, licenses and approvals required to operate our business which could result in an adverse effect on our results of operations. We require certain statutory and regulatory permits, licenses and approvals for our business.***

We may also need to apply for more approvals in the future including renewal of approvals that may expire from time to time. These approvals are subject to periodic renewal. There can be no assurance that the relevant authorities will issue such permits or approvals in the timeframe anticipated by us or at all. Our failure to renew, maintain or obtain the required permits or approvals within the requisite time may result in the interruption of our operations and may have a material adverse effect on our business, financial condition and results of operations. There have been instances wherein we had failed to obtain the licenses and approvals applicable to us. For instance, we have applied for the trade license from Brihanmumbai Municipal Corporation on July 19, 2024, and while the same was applicable to us since incorporation.

Any failure or delay in obtaining such approvals, permits and licenses, may affect our ability to continue our operations, which may in turn have an adverse effect on our business and results of operations. The aforesaid permits, licenses and approvals are subject to several conditions, and we cannot assure you that we shall be able to continuously meet such conditions or be able to prove compliance with such conditions to statutory authorities, which may lead to cancellation, revocation or suspension of relevant permits/licenses/approvals. Further, we cannot assure you that penalties under applicable laws would not be imposed on us in the event of noncompliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action.

- 4. The non-availability or high cost of quality gold bullion and coloured stones may have an adverse effect on our business, results of operations and financial condition.***

Timely procurement of raw materials such as gold bullion as well as the quality and the price, at which it is procured, play an important role in the successful operation of our business. Gold is primarily sourced through various bullion dealers and importers. We may also require specific quality raw materials for a particular jewellery design. Accordingly, our business is affected by the availability, cost and quality of raw materials. The prices and supply of these and other materials depend on factors beyond our control, including general economic conditions, competition, international prices, production levels and regulatory factors such as import duties. Currently, the RBI allows only certain banks in India to import precious metals such as gold and we are subject to the rates of interest charged by these banks. There has been a significant increase in the cost of gold in recent years, which has resulted in an increase in our operational cost. We cannot assure you that we will be able to procure quality raw materials at competitive prices or at all. In addition, if for any reason, our primary suppliers of raw materials should curtail or discontinue their delivery of such raw materials to us, in the quantities we need and at prices that are competitive, our ability to meet our material requirements for our operations could be impaired, our delivery schedules could be disrupted and our business and reputation maybe adversely affected. Further, any rise in gold prices may cause customers to delay their purchases, thereby adversely affecting our business, operations and financial condition.

- 5. Our income and sales are subject to seasonal fluctuations and lower income in a peak season may have a disproportionate effect on our results of operations.***

Our industry has seasonal increases and decreases in revenues and profitability, corresponding with weddings and

festivals. Our sales have historically exhibited certain seasonal fluctuations, reflecting higher sales volumes on festivals and other occasions such as Durga Puja, Akshay Tritiya, Dhanteras, Diwali and Christmas which occur in the third and fourth quarter of the fiscal year. This period also coincides with the wedding season in India. While we stock certain inventory to account for this seasonality, our fixed costs such as employee salaries, Office operating costs and logistics-related expenses, which form a significant portion of operating costs, are relatively constant throughout the year. Consequently, lower than expected net sales during the third or fourth quarters of the fiscal year or more pronounced seasonal variations in sales in the future could have a disproportionate impact on our operating results for the fiscal year, or could strain our resources and impair our cash flows. Any slowdown in demand for our jewellery during peak seasons or failure by us to accurately anticipate and prepare for such seasonal fluctuations could have a material adverse effect on our business, financial condition and results of operations.

6. ***We do not register our jewellery design under the Designs Act, 2000 and we may suffer a loss of income if our designs are duplicated by our competitors. Moreover, we are susceptible to litigation arising out of infringement of copyright of designs.***

As our industry is fashion oriented, there is a constant need for innovation and trend setting. Jewellery designs change on a frequent basis and therefore we do not register the designs used by us, under the Designs Act, 2000.

A major criterion of our product differentiation from jewellery products is the designs we use in our gold jewellery. These designs are made and finalized by a combination of our in-house designers and the freelance designers we engage. Since these designs are not registered under the Designs Act, 2000, we face the risk of our designs being copied, partially or entirely, by our competitors, resulting in us losing one of our important strength. In the absence of registration under the Designs Act, 2000, we cannot protect our designs by invoking any law on our competitors for duplicating our designs, resulting in a loss of income, thus affecting our results of operation and financial condition. Further, we believe that efforts to protect our intellectual property may not be adequate and we may not be able to detect unauthorized use or take appropriate and timely steps to enforce intellectual property rights either owned by us or those that we have right to use. We may also be subject to litigation by one of our competitor or other industry players for copying their designs and in absence registration of our designs, we may not be able protect or defend our case. While, the aforementioned instances have not occurred in the past, however occurrence of any such instances in the future may have an adverse impact on our business, results of operations and financial condition.

We may inadvertently develop a design already registered by a third party, which may require us to either stop the manufacture & sale of such jewellery or be a part of lengthy litigation to defend the same. In both scenarios, we may be subject to losses due to legal costs, stay on sale of certain products and / or both. Further, if any litigation is proved against us, we may be subject to penalty and / or compensation which may adversely affect our cash flows. While we take care to ensure that we comply with the intellectual property rights of third parties and that there are no pending claims against us for infringement of third party intellectual property rights, we cannot determine with certainty whether we are infringing upon any existing third-party intellectual property rights. Any claims of infringement, regardless of merit or resolution of such claims, could force us to incur significant costs in responding to, defending and resolving such claims, and may divert the efforts and attention of our management and technical personnel away from our business. As a result of such infringement claims, we could be required to pay third party infringement claims, alter our technologies, change the brands under which we distribute our products, obtain licenses or cease some portions of our operations. While, the aforementioned instances have not occurred in the past, however the occurrence of any of the foregoing could result in unexpected expenses and thus adversely affect our financial condition.

7. ***We generally do business with our customers on purchase order basis and do not enter into long term contracts with them. Our inability to maintain relationships with our customers could have an adverse effect on our business, prospects, results of operations and financial condition.***

Our business is dependent on our continuing relationships with our customers. Our Company neither has any long term contract with any of customers nor has any marketing tie up for our products. Any change in the buying pattern of our customers can adversely affect the business of our Company. The loss of or interruption of work by, a significant customer or a number of significant customers or the inability to procure new orders on a regular basis or at all may have an adverse effect on our revenues, cash flows and operations. Our business depends on the continuity of our relationship with our customers. There can be no assurance that we will be successful in maintaining such relationships or increasing the number of such relationships. If we are not able to maintain existing relationships with our current customers or if we are not able to develop new relationships, including if we are not able to provide services on a timely basis or offer services that meet the needs of the customers, the number of

customers could decline in the future and as a result, our business, prospects, results of operations and financial condition could be adversely affected in the future.

8. *Our dependency on job worker or Karigars for the performance of our operation may adversely affect our business.*

We are totally dependent on the job worker or Karigars for the performance of our operation. We have not entered into written arrangements with any of these job workers or Karigars, and there can be no assurance that these job workers will continue to be associated with us on reasonable terms, or at all. Although, we work closely with these job workers and Karigars, we do not exercise control over them, and our arrangements with these job workers could involve various risks, including potential interruptions to their operations for factor beyond their or our control, any significant adverse changes in their financial or business conditions, as well as low levels of output or efficiency.

9. *Any fluctuation and variation in price and supply of gold, which is a major raw material for the manufacture of our products, could adversely impact our income.*

Gold is the primary raw materials used in our job work process. Price of gold is volatile in nature and is linked to the international commodity indices. Although we source gold and sell our products on an unfixed basis, any decrease in the prices of gold shall result in the consequent decrease in the price of inventory held in stock. Such uncertainty of gold price may have adverse impact on financial position and profitability of our company.

10. *We face significant competition. Any failure to compete effectively may have a material adverse effect on our business and operations.*

In India jewellery trading industry is highly divided between organized sector and unorganized sector. If we fail to create a position or our existing position deteriorates, the operating results or financial condition will get adversely affected. Aggressive discounting and marketing by competitors may also adversely impact our performance for a temporary period. We may in future experience increase competition from existing or new wholesale traders of jewellery industry. Due to increase in competition, we may temporarily experience downward pressure on prices, lower demand for our products, reduced margins and a loss of market share, all of which would have an adverse impact on our business and results of operations.

11. *We may not be able to implement our growth strategy successfully.*

We may not be able to achieve our planned rate of expansion for our jewellery business. If we are unable to implement our growth strategies successfully, our future growth in income and profits may be adversely affected. In order to expand our business operations successfully, we should enhance our production capacity and access new markets and operate in a profitable manner. If we are unable to access new markets or introducing new designed jewellery in timely manner, it is likely to affect our ability to meet these expansion plans. There can be no assurance that we will be able to achieve our expansion goals, in a timely manner, or at all, or that our expansion plans will be profitable. If we fail to continue to improve our infrastructure or managerial capacity and manpower our growth rate and operating results could be adversely affected.

12. *Inventories and trade receivables form a substantial part of our current assets and net worth. Failure to manage our inventory and trade receivables could have an adverse effect on our net sales, profitability, cash flow and liquidity.*

We are in the business of trading gold jewellery. Our Company's business is working capital intensive and hence inventories and trade receivables would form a major part of our current assets and net worth. The results of operations of our business are and will be dependent on our ability to effectively manage our inventory (raw material and finished goods) and trade receivables. We generally procure raw materials on the basis of management estimates based on past requirements and future estimates. To effectively manage our inventory, we must be able to accurately estimate customer demand and supply requirements and purchase new inventory accordingly. However, if our management misjudges expected customer demand, it could cause either a shortage of products or an accumulation of excess inventory. Further, if we fail to sell the inventory we manufacture, we may be required to write-down our inventory or pay our suppliers without new purchases, or create additional vendor financing, all of which could have an adverse impact on our income and cash flows. To effectively manage our trade receivables, we must be able to accurately evaluate the credit worthiness of our customers and ensure that suitable terms and conditions are given to them in order to ensure our continued relationship with them. However, if our management fails to accurately evaluate the credit worthiness of our customers, it may lead to bad debts, delays in recoveries and

/ or write-offs which could lead to a liquidity crunch, thereby adversely affecting our business and results of operations. A liquidity crunch may also result in increased working capital borrowings and, consequently, higher finance cost which will adversely impact our profitability.

13. *Our results of operations are likely to vary from year to year and be unpredictable, which could cause the market price of the Equity Shares to be volatile.*

Our results of operations in any given year can be influenced by a number of factors, many of which are outside of our control and may be difficult to predict, including:

- our ability to acquire and retain clients for our products & services;
- maintaining high levels of customer satisfaction;
- costs relating to our operations;
- adhering to our high quality and process execution standards;
- pricing policies introduced by our competitors;
- the timing and nature of, and expenses incurred in, our marketing efforts;
- recruiting, training, and retaining sufficient skilled technical and management personnel;
- developing and improving our internal administrative infrastructure, particularly our financial, operational, communications, and other internal systems;

Also, please refer “*Management's Discussion and Analysis of Financial Condition and Results of Operations*” on page 189 for details on the factors affecting our financial results. All of these factors, in combination or alone could negatively impact our revenues and may cause significant fluctuations in our results of operations. This variability and unpredictability could materially and adversely affect our results of operations and financial condition.

14. *The proposed objects of the Issue for which funds are being raised have not been appraised by any bank or financial institution. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials.*

The objects of the Issue for which the funds are being raised have not been appraised by any bank or financial institution. In the absence of such independent appraisal, the requirement of funds raised through this Issue, as specified in the section titled “*Objects of the Issue*” are based on the company’s estimates and internal research. We may have to revise our management estimates from time to time and consequently our funding requirements may also change. This may result in rescheduling of our expenditure plans and an increase or decrease in our proposed expenditure for a particular object. Deployment of these funds is at the discretion of the management and the Board of Directors of the company and will not be subject to monitoring by any independent agency. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials.

15. *We may not be able to maintain our current levels of profitability due to increased costs or reduced spreads or margins.*

Our business strategy involves a relatively high level of ongoing interaction with our clients. We believe that this involvement is an important part of developing our relationship with our clients, identifying new cross selling opportunities and monitoring our performance. However, this level of involvement also entails higher levels of costs and also requires a relatively higher gross spread, or margin, on the various products we offer in order to maintain profitability. There can be no assurance that we will be able to maintain our current levels of profitability if the gross spreads on our products were to reduce substantially, which could adversely affect our results of operations.

16. *If we are unable to establish and maintain an effective system of internal controls and compliances, our business and reputation could be adversely affected.*

We manage our internal compliance by monitoring and evaluating internal controls and ensuring all relevant statutory and regulatory compliances. The Audit Committee along with the Chief Financial Officer and the Company Secretary and Compliance Officer reviews the internal controls and compliances of our Company.

However, there can be no assurance that deficiencies in our internal controls will not arise or that we will be able to implement and continue to maintain adequate measures to rectify or mitigate any such deficiencies in our internal controls, in a timely manner or at all. If we are unable to establish and maintain an effective system of internal controls and compliances, our business and reputation could be adversely affected.

17. We depend on the accuracy and completeness of information about customers and counterparties and any misrepresentation, errors in or incompleteness of such information could cause our business to suffer.

In deciding whether to extend credit or enter into other transactions with customers, we rely on information furnished to us by or on behalf of customers. We may also rely on certain representations from our customers as to the accuracy and completeness of that information. For ascertaining the creditworthiness we do not obtain any independent support from credit information companies or credit bureaus and on independent valuers in relation to the value of the net worth of such parties. Our reliance on any misleading information given may affect our judgment of credit worthiness of potential customers, which may affect our business, prospects, results of operations and financial condition.

18. There are outstanding litigations involving our Company, our Promoters and Directors which, if determined adversely, may affect our business and financial condition.

As on the date of this Draft Prospectus, our Company, our Promoters and Directors are involved in certain legal proceedings. These legal proceedings are pending at different levels of adjudication before various courts and tribunals. The amounts claimed in these proceedings have been disclosed to the extent ascertainable and include amounts claimed jointly and/or severally from us and/or other parties, as the case may be. We cannot assure you that these legal proceedings will be decided in favour of our Company, our Promoters and Directors or that no further liability will arise out of these proceedings. We may incur significant expenses in such legal proceedings and we may have to make provisions in our financial statements, which could increase our expenses and liabilities. Any adverse decision may adversely affect our business, results of operations and financial condition.

19. Our Company proposes to utilize part of the Net Proceeds for repayment or pre-payment, in full or in part, of all or certain secured borrowings availed by our Company and accordingly, the utilization of that portion of the Net Proceeds will not result in creation of any tangible assets.

Our Company intends to utilise a part of the Net Proceeds for repayment or pre-payment, in full or in part, of all or certain secured borrowings availed by our Company. The details of the loans identified to be repaid or prepaid using the Net Proceeds have been disclosed in the section titled “*Objects of the Issue*” on page 71 of this Draft Prospectus. While we believe that utilization of Net Proceeds for repayment of secured loans would help us to reduce our cost of debt and enable the utilization of our funds for further investment in business growth and expansion, the pre-payment of loans will not result in the creation of any tangible assets for our Company.

20. Failure to manage our inventory could have an adverse effect on our net sales, profitability, cash flow and liquidity.

The results of operations of our business are dependent on our ability to effectively manage our inventory and stocks. To effectively manage our inventory, we must be able to accurately estimate customer demand and supply requirement accordingly. If our management has misjudged expected customer demand it could adversely impact the results by causing either a shortage of products or an accumulation of excess inventory.

21. Any adverse change in regulations governing our products, may adversely impact our business prospects and results of operations.

An adverse change in the regulations governing the development of our products and their usage by our customers, including the development of licensing requirements and technical standards and specifications or the imposition of onerous requirements, may have an adverse impact on our operations. Our Company may be required to alter our distribution process and target markets and incur capital expenditure to achieve compliance with such new regulatory requirements applicable to us and our customers.

We cannot assure you that we will be able to comply with the regulatory requirements. If we fail to comply with new statutory or regulatory requirements, there could be a delay in the submission or grant of approval for marketing new products or we may be required to withdraw existing products from the market. Moreover, if we fail to comply

with the various conditions attached to such approvals, licenses, registrations and permissions once received, the relevant regulatory body may suspend, curtail or revoke our ability to market such products and/or we may be deemed to be in breach of our arrangements with our customers. Consequently, there is an inherent risk that we may inadvertently fail to comply with such regulations, which could lead to forced shutdowns and other sanctions imposed by the relevant authorities, as well as the withholding or delay in receipt of regulatory approvals for our new products, which may adversely impact our business, results of operations and financial condition.

22. Our Company requires significant amount of working capital for a continuing growth. Our inability to meet our working capital requirements may adversely affect our results of operations.

Our business requires a significant amount of working capital. We fund a majority of our working capital requirements in the ordinary course of business from banks facilities and internal accruals. Our Company requires additional working capital for funding its incremental working capital requirements and releasing the internal accruals deployed in working capital. The funding of the incremental working capital requirements will lead to a consequent increase in our profitability, ability to utilize internal accruals for growth opportunities and achieving the proposed targets as per our business plan. Further, we are also required to meet the increasing demand and for achieving the same, adequate stocks have to be maintained which requires sufficient working capital. In the event, we are unable to source the required amount of working capital for addressing such increased demand of our products, we might not be able to efficiently satisfy the demand of our customers. Even if we are able to source the required amount of funds, we cannot assure you that such funds would be sufficient to meet our cost estimates and that any increase in the expenses will not affect the price of our products. On the basis of the existing and estimated working capital requirement of our Company, and assumptions for such working capital requirements, the estimated working capital requirements for Fiscals 2025 and 2026 as set forth below:

(₹ in Lakhs)

(C)	Total working capital requirements (C = A – B)	4,287.65	5,700.40
(D)	Funding pattern		
(a)	IPO proceeds	1,900.00	-
(b)	Borrowings from banks, financial institutions and non-banking financial companies (including bill discounting) and/or internal accruals	2,387.65	5,700.40
	Total	4,287.65	5,700.40

Note: Pursuant to the certificate dated November 07, 2024 issued by the Statutory Auditor.

Our Company shall also fund the incremental working capital requirements by availing loan facilities.

Further, one of the objects of this Issue includes funding of working capital requirements of our Company, which is based on management estimates and certain assumptions. For more information in relation to such management estimates and assumptions, please see “Objects of the Issue” on page 71. Our working capital requirements may be subject to change due to factors beyond our control including force majeure conditions, an increase in defaults by our customers, non-availability of funding from banks or financial institutions. Accordingly, such working capital requirements may not be indicative of the actual requirements of our Company in the future and investors are advised to not place undue reliance on such estimates of future working capital requirements.

Any delay in processing our payments by our customers may increase our working capital requirement. Further, if a customer defaults in making payments for a product on which we have devoted significant resources, it could affect our profitability and liquidity and decrease the capital reserves that are otherwise available for other uses. We may file a claim for compensation of the loss that we incurred pursuant to such defaults but settlement of disputes generally takes time and financial and other resources, and the outcome is often uncertain. In general, we take provisions for bad debts, including those arising from such defaults based primarily on ageing and other factors such as special circumstances relating to special customers. There can be no assurance that such payments will be

remitted by our clients to us on a timely basis or that we will be able to effectively manage the level of bad debt arising from defaults. We may also have large cash outflows, including among others, losses resulting from environmental liabilities, litigation costs, adverse political conditions, foreign exchange risks and liability claims.

All of these factors may result, in increase in the amount of receivables and short-term borrowings. If we decide to raise additional funds through the incurrence of debt, our interest and debt repayment obligations will increase, and could have a significant effect on our profitability and cash flows and we may be subject to additional covenants, which could limit our ability to access cash flows from operations. Any issuance of equity, on the other hand, could result in a dilution of your shareholding. Accordingly, continued increases in our working capital requirements may have an adverse effect on our financial condition and results of operations.

23. Our Company has experienced negative cash flow in the past and may continue to do so in the future, which could have a material adverse effect on our business, prospects, financial condition, cash flows and results of operations.

Our Company has experienced negative net cash flow in operating, investing and financing activities in the past, the details of which are provided below:

(₹ in lacs)

Particulars	Six month period ended September 30, 2024	31-Mar-24	1st October 2022 to 31st March 2023	1st April 2022 to 30th September 2022	31-Mar-22
Net Cash Flow from/(used in) Operating Activities	719.66	(209.33)	(98.13)	87.31	133.61
Net cash generated from/(used in) investing activities	(17.17)	12.57	(16.03)	-	(6.75)
Net Cash Flow from/(used in) Financing Activities	(631.43)	318.37	165.06	(88.00)	(128.11)

We may incur negative cash flows in the future which may have a material adverse effect on our business, prospects, results of operations and financial condition.

24. We are dependent on information technology systems in carrying out our business activities and it forms an integral part of our business. Further, if we are unable to adapt to technological changes and successfully implement new technologies or if we face failure of our information technology systems, we may not be able to compete effectively which may result in higher costs and would adversely affect our business and results of operations.

We are dependent on information technology system in connection with carrying out our business activities and such systems form an integral part of our business. Any failure of our information technology systems could result in business interruptions, including the loss of our customers, loss of reputation and weakening of our competitive position, and could have a material adverse effect on our business, financial condition and results of operations. Additionally, our information technology systems, specifically our software may be vulnerable to computer viruses, piracy, hacking or similar disruptive problems. Computer viruses or problems caused by third parties could lead to disruptions in our business activities. Fixing such problems caused by computer viruses or security breaches may require interruptions, delays or temporary suspension of our business activities, which could adversely affect our operations. Breaches of our information technology systems may result in unauthorized access to confidential information. Such breaches of our information technology systems may require us to incur further expenditure to put in place advanced security systems to prevent any unauthorised access to our networks. In the event, any breach of our systems or software leads to the leaking of our trade secrets or any inventive techniques devised by our Company, it might lead to loss of our originality in the market and increase the chance of our products being substituted by the products of our competitors.

Our future success depends in part of our ability to respond to technological advancements and emerging standards and practices on a cost-effective and a timely basis. Our failure to successfully adopt such technologies in a cost-effective manner could increase our costs thereby compelling us to bid at lower margins which might lead to loss of bidding opportunities vis-à-vis such competitors. Additionally, the government authorities may require adherence with certain technologies and we cannot assure you that we would be able to implement such technologies in a timely manner or at all. The cost of upgrading or implementing new technologies or upgrading our existing equipment or expanding our capacity could be significant, less cost effective and therefore could negatively impact our profitability, results of operations, financial condition as well as our future prospects.

25. *We may be unable to grow our business in additional geographic regions or international markets, which may adversely affect our business prospects and results of operations.*

We plan to export our products in international markets especially Dubai. Dubai has long been a vital center for gold trading, benefiting from earlier free trade policies that bolstered its status as a key hub for both consumption and trading of the precious metal. Infrastructure and logistical challenges in the gold industry, changing customers' taste and preferences may prevent us from expanding our presence or increasing the penetration of our products. Further, customers may be price conscious and we may be unable to compete effectively with the products of our competitors. If we are unable to grow our business in these new markets effectively, our business prospects, results of operations and financial condition may be adversely affected.

Further, expansion into new international markets is important to our long-term prospects. Competing successfully in international markets requires additional management attention and resources to tailor our services to the unique aspects of each new country. We may face various risks, including legal and regulatory restrictions, increased advertising and brand building expenditure, challenges caused by distance, language and cultural differences, in addition to our limited experience with such markets and currency exchange rate fluctuations. International markets require a very high standard of quality of products and our Company may not be able to match the international standards thereby failing to make a brand presence in the international markets. If we are unable to make long-lasting relations with the major customers in the overseas market or if we are unable to justify the quality of our products to them, it may make it difficult for us to enter into such markets. These and other risks, which we do not foresee at present, could adversely affect any international expansion or growth, which could have an adverse effect on our business, results of operations and financial condition.

26. *Demand for our products is subject to rapid and unpredictable changes in fashion trends and consumer preferences, and our inability to anticipate and address such changes may adversely affect our business prospects, results of operations and financial condition.*

The jewellery industry, like other luxury retail industries, is subject to rapid and unpredictable changes in fashion trends and customer preferences. Customer preferences for jewellery designs and types may vary significantly from region to region in India. Also, trends in fashion today change rapidly and a particular jewellery design may go out of trend resulting in increased unsold inventory. We cannot guarantee that we will be able to adopt the latest trends immediately, thus giving our competitors a first mover advantage, if they are able to identify the changes before we do. Furthermore, the increasing popularity of branded jewellery merchandise may adversely impact our business prospects and revenues if we are unable to increase our sales to branded jewellery retailers. In addition, the availability and consumer acceptance of alternates such as diamond jewellery, silver or platinum jewellery or a shift in customer preference to other luxury products or a rise in use of imitation jewellery products, may also adversely affect our business. Our inability to anticipate, identify and react appropriately or in a timely manner to customer preferences, or failure to develop and implement customer oriented sales policies that influence customer purchase decisions, could result in a decrease in consumer acceptance of our products, a diminished brand image and market share, which could result in lower profits. These changes can adversely affect our business prospects, results of operations and financial condition.

27. *If our Company is unable to protect its intellectual property, or if our Company infringes on the intellectual property rights of others, our business may be adversely affected.*

Our Company is currently using logo , which is not yet registered in the name of our Company. While, we have made applications for registering the name and logo of our Company, however the application is pending for approval. If we are unable to get the same registered with the trademark authorities then, our Company may not be able to successfully enforce or protect our intellectual property rights and obtain statutory protections available under the Trademarks Act, 1999, as otherwise available for registered trademarks in future could have a material adverse effect on our business and goodwill, which in turn could adversely affect our results of operations.

There can be no assurance that third parties will not infringe upon our intellectual property, causing damage to our business prospects, reputation and goodwill. Our efforts to protect our intellectual property may not be adequate and may lead to erosion of our business value and our operations could be adversely affected. We may need to litigate in order to determine the validity of such claims and the scope of the proprietary rights of others. Any such litigation could be time consuming and costly and the outcome cannot be guaranteed. We may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect its intellectual property, which could adversely affect our business, results of operations and financial condition. For further details, please refer to the

chapters titled “*Our Business*” and “*Government and other Statutory Approvals*” on pages 107 and 211, respectively of this Draft Prospectus.

28. *Our Promoters, Directors and Key Managerial Personnel have interests in our Company other than reimbursement of expenses incurred or normal remuneration or benefits.*

Our Promoters, Directors and Key Managerial Personnel, may be deemed to be interested in our Company, in addition to the regular remuneration or benefits, reimbursements of expenses, Equity Shares held by them or their relatives, their dividend or bonus entitlement, benefits arising from their directorship in our Company. Our Promoters, Director and Key Managerial Personnel may also be interested to the extent of any transaction entered into by our Company with any other company or firm in which they are directors or partners. For further details please refer to the paragraphs titled — “*Interest of our Directors*” in the chapter titled — “*Our Management*”, the paragraphs titled — “*Interest of our Promoters and Other Interests and Disclosures*” in the chapter titled — “*Our Promoters and Promoter Group*”, “*Financial Indebtedness*” and “*Restated Financial Information*” on pages 144, 155, 203, and 162, respectively of this Draft Prospectus.

There can be no assurance that our Promoters, Directors, Key Management Personnel will exercise their rights as shareholders to the benefit and best interest of our Company. Our Promoters and members of our Promoter Group will continue to exercise significant control over our Company, including being able to control the composition of our Board of Directors and determine decisions requiring simple or special majority voting of shareholders, and our other shareholders may be unable to affect the outcome of such voting. Our Directors and our Key Management Personnel may take or block actions with respect to our business, which may conflict with the best interests of our Company or that of minority shareholders.

29. *Our Promoters and members of the Promoter Group have significant control over the Company and have the ability to direct our business and affairs; their interests may conflict with your interests as a shareholder.*

Upon completion of this Issue, our Promoters and members of our Promoter Group will collectively hold [●]% of the Equity share capital of our Company. As a result, our Promoters will have the ability to exercise significant influence over all matters requiring shareholders’ approval. Accordingly, our Promoters will continue to retain significant control, including being able to control the composition of our Board of Directors, determine decisions requiring simple or special majority voting of shareholders, undertaking sale of all or substantially all of our assets, timing and distribution of dividends and termination of appointment of our officers, and our other shareholders may be unable to affect the outcome of such voting. There can be no assurance that our Promoters will exercise their rights as shareholders to the benefit and best interests of our Company. Further, such control could delay, defer or prevent a change in control of our Company, impede a merger, consolidation, takeover or other business combination involving our Company, or discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of our Company even if it is in our Company’s best interest. The interests of our Promoters could conflict with the interests of our other equity shareholders, and our Promoters could make decisions that materially and adversely affect your investment in the Equity Shares.

30. *The average cost of acquisition of Equity Shares held by our Promoters is lower than the Issue Price.*

Our Promoters’ average cost of acquisition of Equity Shares in our Company is lower than the Issue Price which is proposed to be determined on a fixed price basis. The average cost of acquisition of Shares for the Promoters is as follows:

Name of Promoters	No. of shares held	Average Cost of Acquisition (in ₹)
Hirachand P Gulecha (HUF)	37,05,000	8.10
Niraj Hirachand Gulecha	28,28,150	7.99
Khusbhu Niraj Gulecha	12,84,400	7.86
Hirachand Pukhraj Gulecha	9,75,650	7.79

For further details regarding average cost of acquisition of Equity Shares by our Promoters in our Company and build-up of Equity Shares by our Promoters in our Company, please refer to the chapter titled “*Capital Structure*” on page 57 of this Draft Prospectus.

31. *Our future fund requirements, in the form of further Issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the Shareholders depending upon the terms on which they are eventually raised.*

We may require additional capital from time to time depending on our business needs. Any further Issue of Equity Shares or convertible securities would dilute the shareholding of the existing Shareholders and such issuance may be done on terms and conditions, which may not be favorable to the then existing Shareholders. If such funds are raised in the form of loans or debt or preference shares, then it may substantially increase our fixed interest/dividend burden and decrease our cash flows, thus adversely affecting our business, results of operations and financial condition.

32. *We have in past entered into related party transactions and we may continue to do so in the future.*

As of September 30, 2024, we have entered into several related party transactions with our Promoters, individuals and entities forming a part of our promoter group relating to our operations. In addition, we have in the past also entered into transactions with other related parties. For further details, please refer to the chapter titled — “*Restated Financial Information*” at page 162.

While all such transactions have been conducted on an arm’s length basis, in accordance with the Companies Act and other applicable regulations pertaining to the evaluation and approval of such transactions and all related party transactions that we may enter into post-listing, will be subject to Board or Shareholder approval, as necessary under the Companies Act, the SEBI Listing Regulations and other application laws. Further, it is likely that we may enter into additional related party transactions in the future. Such future related party transactions may potentially involve conflicts of interest.

While we believe that all our related party transactions have been conducted on an arm’s length basis, we cannot assure you that we may not have achieved more favorable terms had such transactions been entered into with unrelated parties. There can be no assurance that such transactions, individually or taken together, will not have an adverse effect on our business, prospects, results of operations and financial condition, including because of potential conflicts of interest or otherwise. In addition, our business and growth prospects may decline if we cannot benefit from our relationships with them in the future.

33. *Our agreements with lenders for financial arrangements contain restrictive covenants for certain activities and if we are unable to get their approval, it might restrict our scope of activities and impede our growth plans.*

We have entered into agreements for our borrowings with certain lenders. These borrowings include secured fund based and non-fund based facilities. These agreements include restrictive covenants which mandate certain restrictions in terms of our business operations such as change in capital structure, formulation of any scheme of amalgamation or reconstruction, declaring dividends, further expansion of business, granting loans to directors, repaying unsecured loans from third parties, undertake guarantee obligations on behalf of any other borrower, which require our Company to obtain prior approval of the lenders for any of the above activities. We cannot assure you that our lenders will provide us with these approvals in the future. For details of these restrictive covenants, please refer to chapter titled — “*Financial Indebtedness*” on page 203 of this Draft Prospectus.

Further, some of our financing arrangements include covenants to maintain our total outside liabilities and total net worth up to a certain limit and certain other liquidity ratios. We cannot assure prospective investors that such covenants will not hinder our business development and growth in the future. A default under one of these financing agreements may also result in cross-defaults under other financing agreements and result in the outstanding amounts under such financing agreements becoming due and payable immediately. Defaults under one or more of our Company’s financing agreements may limit our flexibility in operating our business, which could have an adverse effect on our cash flows, business, results of operations and financial condition.

It may be possible for a lender to assert that we have not complied with all applicable terms under our existing financing documents. Further we cannot assure that we will have adequate funds at all times to repay these credit facilities and may also be subject to demands for the payment of penal interest.

34. *In addition to our existing indebtedness for our existing operations, we may incur further indebtedness during the course of business. We cannot assure that we would be able to service our existing and/ or additional indebtedness.*

In addition to the indebtedness for our existing operations, we may incur further indebtedness during the course of our business. We cannot assure you that we will be able to obtain further loans at favorable terms. Increased borrowings, if any, may adversely affect our debt-equity ratio and our ability to borrow at competitive rates. In

addition, we cannot assure you that the budgeting of our working capital requirements for a particular year will be accurate. There may be situations where we may under-budget our working capital requirements, which may lead to delays in arranging additional working capital requirements, loss of reputation, levy of liquidated damages and can cause an adverse effect on our cash flows.

Any failure to service our indebtedness or otherwise perform our obligations under our financing agreements entered with our lenders or which may be entered into by our Company, could trigger cross default provisions, penalties, acceleration of repayment of amounts due under such facilities which may cause an adverse effect on our business, financial condition and results of operations. For details of our indebtedness, please refer to the chapter titled — “*Financial Indebtedness*” on page 203 of this Draft Prospectus.

- 35. *We have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. Further, we have not identified any alternate source of financing the ‘Objects of the Issue’. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.***

As on date, we have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. We meet our capital requirements through our bank finance, unsecured loans, owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further, we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this Issue or any shortfall in the Issue proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details, please refer to the chapter titled “*Objects of the Issue*” beginning on page 71 of this Draft Prospectus.

- 36. *Our success largely depends upon the knowledge and experience of our Promoters, Directors and our Key Managerial Personnel. Loss of any of our Directors and key managerial personnel or our ability to attract and retain them could adversely affect our business, operations and financial condition.***

The growth and success of our Company’s future significantly depends upon the experience of our Promoters and continued services and the management skills of our Key Managerial Personnel and the guidance of our Promoters and Directors for development of business strategies, monitoring its successful implementation and meeting future challenges. We believe the expertise, experience and continued efforts of our Key Managerial Personnel and their inputs are valuable to for the operations of our Company. Our future success and growth depend largely on our ability to attract, motivate and retain the continued service of our highly skilled management personnel. Our Company has never been faced with a challenge of high rate of attrition of our Key Management Personnel in the past, however, any attrition of our experienced Key Managerial Personnel, would adversely impact our growth strategy. We cannot assure you that we will be successful in recruiting and retaining a sufficient number of personnel with the requisite skills to replace those Key Managerial Personnel who leave. In the event we are unable to motivate and retain our key managerial personnel and thereby lose the services of our highly skilled Key Managerial Personnel may adversely affect the operations, financial condition and profitability of our Company and thereby hampering and adversely affecting our ability to expand our business. For further details on our Directors and Key Managerial Personnel, please refer to the chapter titled — “*Our Management*” on page 138 of this Draft Prospectus.

- 37. *Our inability to procure and/or maintain adequate insurance cover in connection with our business may adversely affect our operations and profitability.***

Our operations are subject to inherent risks and hazards which may adversely impact our profitability, such as fire, riots, third party liability claims, loss-in-transit for our products, accidents and natural disasters. Presently, we maintain adequate insurance policies, details of which have been provided below:

Insurer	Policy No.	Expiry date	Description of Property Insured	Insured Amount (₹ in Lakhs)
ICICI Lombard General Insurance- Jeweller’s Package Policy Sookshma	4093/S/363043313/00/000	October 9, 2025	Office premises including display window and locked safe	2,000.00
			Stock in hands of directors, employees, brokers, agents, gold smiths, cutters, minakar and polisher or other persons/agencies	925.00

Insurer	Policy No.	Expiry date	Description of Property Insured	Insured Amount (₹ in Lakhs)
			Stock in transit	235.00
			Furniture/fixture	2.50
			Fidelity Employees	235.00
			Money in transit and safe	6.00

There are many events that could cause significant damages to our operations, or expose us to third-party liabilities, whether or not known to us, for which we may not be insured or adequately insured, which in turn may expose us to certain risks and liabilities. There can be no assurance that our insurance policies will be adequate to cover the losses in respect of which the insurance had been availed. Further, there can be no assurance that any claim under the insurance policies maintained by us will be honored fully, in part, or on time. If we were to incur a significant liability for which we were not fully insured, it could adversely affect our results of operations and financial position.

38. *Our ability to pay dividends in the future may be affected by any material adverse effect on our future earnings, financial condition or cash flows.*

Our ability to pay dividends in future will depend on our earnings, financial condition and capital requirements. We may be unable to pay dividends in the near or medium term, and our future dividend policy will depend on our capital requirements and financing arrangements in respect of our operations, financial condition and results of operations. Our Company has not declared dividends in the past, and there can be no assurance that our Company will declare dividends in the future also. For further details, please refer to the chapter titled “*Dividend Policy*” on page 161 of this Draft Prospectus.

39. *Increased losses due to fraud, employee negligence, theft or similar incidents may have an adverse impact on us.*

Our business and the industry in which we operate are vulnerable to the problem of pilferage by employees, damage, misappropriation of cash and inventory management and logistical errors. An increase in product losses due to such factors at our place of operation may require us to install additional security and surveillance equipment and incur additional expenses towards inventory management and handling. We cannot assure you whether these measures will successfully prevent such losses. Further, there are inherent risks in cash management as part of our operations, which include theft and robbery, employee fraud and the risks involved in transferring cash to banks. Additionally, in case of losses due to theft, financial misappropriation, fire, breakage or damage caused by other casualties, we cannot assure you that we will be able to recover from our insurers the full amount of any such loss in a timely manner, or at all. In addition, if we file claims under an insurance policy it could lead to increases in the insurance premiums payable by us or the termination of coverage under the relevant policy. While, the aforementioned instances have not occurred in the past, however occurrence of any such instances in the future may have an adverse impact on our business, results of operations and financial condition.

40. *The requirements of being a listed company may strain our resources.*

We are not a listed Company and have not, historically, been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the listing agreements with the Stock Exchanges and compliances of SEBI (LODR) Regulations which will require us to file audited annual and unaudited half yearly results and limited review reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies which may adversely affect the financial position of the Company.

As a listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions to support the existence of effective disclosure controls and procedures, internal control over financial reporting and additional compliance requirements under the Companies Act, 2013. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management oversight will be required. As a result, management’s attention may be diverted from other business concerns, which could adversely affect our business, prospects, financial condition and results of operations. In addition, we may need to hire additional legal and accounting staff with appropriate listed company

experience and technical accounting knowledge and we cannot assure you that we will be able to do so in a timely manner.

41. *Delay in raising funds from the IPO could adversely impact the implementation schedule.*

The proposed fund requirement, for working capital, primarily, as detailed in the chapter titled “*Objects of the Issue*” beginning on page 71 is to be funded from the proceeds of this IPO. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We, therefore, cannot assure that we would be able to execute our future plans/strategy within the estimated time frame.

42. *The Equity Shares have never been publicly traded and the Issue may not result in an active or liquid market for the Equity Shares.*

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. Although we currently intend that the Equity Shares will remain listed on the Stock Exchanges, there is no guarantee of the continued listing of the Equity Shares. Failure to maintain our listing on the Stock Exchanges or other securities markets could adversely affect the market value of the Equity Shares.

The Issue Price of the Equity Shares is proposed to be determined through a fixed price process in accordance with the SEBI ICDR Regulations and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors. You may not be able to resell your Equity Shares at a price that is attractive to you.

43. *There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the SME Platform of National Stock Exchange of India Limited in a timely manner or at all.*

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuance of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the SME Platform of National Stock Exchange of India Limited. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

44. *There is no existing market for our Equity Shares, and we do not know if one will develop to provide you with adequate liquidity. Further, an active trading market for the Equity Shares may not develop and the price of the Equity Shares may be volatile.*

An active public trading market for the Equity Shares may not develop or, if it develops, may not be maintained after the Issue. Our Company, in consultation with the lead manager, will determine the Issue Price. The Issue Price may be higher than the trading price of our Equity Shares following this Issue. As a result, investors may not be able to sell their Equity Shares at or above the Issue Price or at the time that they would like to sell. The trading price of the Equity Shares after the Issue may be subject to significant fluctuations in response to factors such as, variations in our results of operations, market conditions specific to the sectors in which we operate economic conditions of India and volatility of the securities markets elsewhere in the world.

45. *The price of the Equity Shares may be highly volatile after the Issue.*

The price of the Equity Shares on the Indian stock exchanges may fluctuate after this Issue as a result of several factors, including, volatility in the Indian and global securities market; our operations and performance; performance of our competitors and the perception in the market about investments in the our industry; adverse media reports on us or the industry; changes in the estimates of our performance or recommendations by financial analysts; significant developments in India’s economic liberalization and deregulation policies; and significant developments in India’s fiscal and environmental regulations. There can be no assurance that the prices at which the Equity Shares are initially traded will correspond to the prices at which the Equity Shares will trade in the market subsequently.

46. Any variation in the utilisation of the Net Proceeds or in the terms of any contract as disclosed in the Draft Prospectus would be subject to certain compliance requirements, including prior shareholders' approval.

Our Company intends to use the Net Proceeds towards funding of working capital requirements and repayment of unsecured borrowings. Our Board will have flexibility in temporarily investing the Net Proceeds as well as its inter se allocation across various heads, as disclosed in the section titled “*Objects of the Issue*” on page 71.

In case of any exigencies arising out of business conditions, economic conditions, competition or other factors beyond our control which adversely affect our business, we may require to use the Net Proceeds to meet any other expenditure or fund which expenditure cannot be determined with certainty as on the date of this Draft Prospectus. In terms of Section 27 of the Companies Act, 2013, we cannot undertake any variation in the utilisation of the Net Proceeds or in the terms of any contract as disclosed in the Draft Prospectus without obtaining the shareholders' approval through a special resolution. In the event of any such circumstances requiring us to undertake variation in the utilisation of the Net Proceeds disclosed in the Draft Prospectus, we cannot assure that we will be able to obtain the shareholders' approval in a timely manner, or at all. Any delay or inability in obtaining such shareholders' approval may adversely affect our business or operations.

Further, our Promoters would be required to provide an exit opportunity to the shareholders who do not agree with our proposal to change the objects of the Issue. Additionally, the requirement on Promoters to provide an exit opportunity to such dissenting shareholders may deter the Promoters from agreeing to the variation of the proposed utilisation of the Net Proceeds, even if such variation is in the interest of our Company. Further, we cannot assure you that the Promoters of our Company will have adequate resources at their disposal at all times to enable them to provide an exit opportunity at the price prescribed by SEBI.

In light of these factors, we may not be able to undertake variation of objects of the Issue to use any unutilized proceeds of the Fresh Issue, if any, or vary the terms of any contract referred to in the Draft Prospectus, even if such variation is in the interest of our Company. This may restrict our Company's ability to respond to any change in our business or financial condition by re-deploying the unutilised portion of Net Proceeds, if any, which may adversely affect our business and results of operations.

47. You will not be able to sell immediately on the Stock Exchanges any of the Equity Shares you purchase in the Issue.

The Equity Shares will be listed on the Emerge Platform of National Stock Exchange of India Limited. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading may commence. Upon receipt of final approval from the Stock Exchanges, trading in the Equity Shares is to commence within six (6) working days of the date of closure of the Issue or such other time as may be prescribed by SEBI.

We cannot assure that the Equity Shares will be credited to investors' demat accounts, or that trading in the Equity Shares will commence, within the time period prescribed by law. Further, there can be no assurance that the Equity Shares to be Allotted pursuant to this Issue will be listed on the Stock Exchanges in a timely manner or at all.

48. There are restrictions on daily movements in the trading price of the Equity Shares, which may adversely affect a shareholder's ability to sell Equity Shares or the price at which Equity Shares can be sold at a particular point in time.

Our listed Equity Shares will be subject to a daily “circuit breaker” imposed on listed companies by the Stock Exchanges, which does not allow transactions beyond certain volatility in the trading price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on the Equity Shares' circuit breaker will be set by the Stock Exchanges based on historical volatility in the price and trading volume of the Equity Shares. The Stock Exchanges are not required to inform our Company of the percentage limit of the circuit breaker, and they may change the limit without our knowledge. This circuit breaker would effectively limit the upward and downward movements in the trading price of the Equity Shares. As a result of this circuit breaker, there can be no assurance regarding the ability of shareholders to sell Equity Shares or the price at which shareholders may be able to sell their Equity Shares.

49. The price of the Equity Shares may be volatile, which could result in substantial losses for investors acquiring the Equity Shares in the Issue.

The market price of the Equity Shares may be volatile and could fluctuate significantly and rapidly in response to, among others, the following factors, some of which are beyond our control:

- volatility in the Indian and global securities market or in the value of the Rupee relative to the U.S. Dollar, the Euro and other foreign currencies;
- our profitability and performance;
- changes in financial analysts' estimates of our performance or recommendations;
- perceptions about our future performance or the performance of Indian companies in general;
- significant developments in India's economic liberalisation and deregulation policies;
- significant developments in India's fiscal and environmental regulations;
- economic developments in India and in other countries; and
- any other political or economic factors.

These fluctuations may be exaggerated if the trading volume of the Equity Shares is low. Volatility in the price of the Equity Shares may be unrelated or disproportionate to our results of operations. It may be difficult to assess our performance against either domestic or international benchmarks.

Indian stock exchanges, including the Stock Exchanges, have experienced substantial fluctuations in the prices of listed securities and problems such as temporary exchange closures, broker defaults, settlement delays and strikes by brokers. The governing bodies of Indian stock exchanges have also, from time to time, imposed restrictions on trading in certain securities, limitations on price movements and margin requirements. Further, disputes have occurred between listed companies, stock exchanges and other regulatory bodies, which in some cases may have had a negative effect on market sentiment. If such or similar problems were to continue or recur, they could affect the market price and liquidity of the securities of Indian companies, including the Equity Shares.

50. Any future issuance of Equity Shares, or convertible securities or other equity-linked securities by our Company may dilute your shareholding and any sale of Equity Shares by our Promoters or members of our Promoter Group may adversely affect the trading price of the Equity Shares.

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by our Company may dilute your shareholding in our Company; adversely affect the trading price of the Equity Shares and our ability to raise capital through further issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. We cannot assure you that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our Promoters and Promoter Group, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. We cannot assure you that our Promoters and Promoter Group will not dispose of, pledge or encumber their Equity Shares in the future.

51. Sale of Equity Shares by our Promoters or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.

Any instance of disinvestments of Equity Shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sale of Equity Shares might occur.

52. Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

EXTERNAL RISK FACTORS

53. *Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business and financial performance.*

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy. For example, the Government of India implemented a comprehensive national goods and services tax (“**GST**”) regime with effect from July 1, 2017, that combined multiple taxes and levies by the Central and State Governments into a unified tax structure. Our business and financial performance could be adversely affected by any unexpected or onerous requirements or regulations resulting from the amendment of GST or any changes in laws or interpretation of existing laws, or the promulgation of new laws, rules and regulations relating to GST. The Government has enacted the GAAR which have come into effect from April 1, 2017.

The Government of India has announced the union budget for Fiscal 2024 and the Ministry of Finance has notified the Finance Act, 2023 (“**Finance Act**”). There is no certainty on the impact that the Finance Act may have on our business and operations or on the industry in which we operate. We cannot predict whether any amendments made pursuant to the Finance Act would have a material adverse effect on our business, financial condition and results of operations. Unfavorable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment and stamp duty laws governing our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals. For instance, the Supreme Court of India has, in a decision clarified the components of basic wages, which need to be considered by companies while making provident fund payments. Our Company has not made relevant provisions for the same, as on date. Any such decisions in future or any further changes in interpretation of laws may have an impact on our results of operations. Further, the Personal Data Protection Bill, 2019 (“**PDP Bill**”) was introduced to propose a legal framework governing the processing of personal data. However, the PDP Bill has been withdrawn on August 3, 2022 and the Ministry of Electronics and Information Technology, Government of India (“**MoEIT**”) has submitted a new Digital Personal Data Protection Bill, 2022 before the Parliament.

We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current businesses or restrict our ability to grow our businesses in the future.

54. *Our business is substantially affected by prevailing economic conditions in India.*

We perform all of our activities in India, and the predominant portions of our customers are Indian nationals. As a result, we are highly dependent on prevailing economic conditions in India and our results of operation are significantly affected by factors influencing the Indian economy. Factors that may adversely affect the Indian economy, and hence our results of operations, include:

- any increase in Indian interest rates or inflation;
- prevailing income conditions among Indian consumers and Indian corporations;
- changes in India’s present tax, trade, fiscal or monetary policies;
- natural disasters, political instability, communal disturbances, riots, civil unrest, terrorism or military conflict in India or in countries in the region or globally, including in India’s various neighboring countries; and
- prevailing national, regional or global economic conditions, including in India’s principal export markets.

In addition to the factors set forth above, our business may be affected by adverse changes specific to the industries in which we operate.

55. *Foreign investors are subject to foreign investment restrictions under Indian law.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection or a tax clearance certificate from the income tax authority. We cannot assure you that any required approval from the RBI or any other Government agency can be obtained on any particular terms or at all.

56. Any downgrading of India's debt rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings international debt by international rating agencies may adversely affect our ability to raise additional overseas financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our ability to fund our growth on favourable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

57. Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

58. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance of our business. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence and spending. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

59. Natural calamities could have a negative impact on the Indian economy and cause our business to suffer.

India has experienced natural calamities such as earthquakes, tsunami, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

60. Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well as the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

1. Prepayment or repayment of certain loans availed by our Company;
2. Funding of working capital requirements of our Company;
3. General Corporate Purposes.

(Collectively, referred to herein as the “**Objects**”)

The main objects clause of our Memorandum of Association and the objects incidental and ancillary to the main objects enable us to undertake the activities for which funds are being raised in the Issue. The existing activities of our Company are within the objects clause of our Memorandum of Association.

Additionally, we believe that the listing of Equity Shares will enhance our Company’s corporate image, brand name and create a public market for our Equity Shares in India.

The details of the proceeds of the Issue are set out in the following table:

Particulars	Estimated amount ⁽¹⁾
Gross Proceeds from the Issue	[●]
(Less) Issue related expenses	[●]
Net Proceeds	[●]

⁽¹⁾To be finalized on determination of the Issue Price and updated in the Prospectus prior to filing with the ROC.

Requirement of Funds and Utilization of Net Proceeds

The Net Proceeds are proposed to be used in the manner set out in in the following table:

⁽¹⁾To be finalized on determination of the Issue Price and updated in the Prospectus prior to filing with the ROC. The amount utilised for general corporate purposes shall not exceed 25% of the Gross Proceeds of the Issue.

Schedule of implementation

We propose to deploy the Net Proceeds towards the aforesaid Objects in accordance with the estimated schedule of implementation and deployment of funds set forth in the table below.

(₹ in Lakhs)

Sr. No.	Particulars	Total Estimated Cost	Amount to be funded from the Net Proceeds	Amount to be funded from internal accruals	Estimated Utilisation of Net Proceeds Fiscal 2025
1.	Prepayment or repayment of certain loans availed by our Company	300	300	Nil	300
2.	Funding of working capital requirements of our Company ^	1,900	1,900	Nil	1,900
3.	General corporate purposes *	[•]	[•]	Nil	[•]

*To be finalized on determination of the Issue Price and updated in the Prospectus prior to filing with the RoC.

^Our Company shall also fund the incremental working capital requirements by availing loan facilities.

Since, the entire fund requirement are to be funded from the proceeds of the Issue, there is no requirement to make firm arrangements of finance under Regulation 230(1)(e) of the SEBI ICDR Regulations through verifiable means towards at least 75% of the stated means of finance, excluding the amounts to be raised through the proposed Issue.

Given the dynamic nature of the industry and specifically that of our business, we may have to revise our funding requirements and deployment on account of a variety of factors such as our financial condition, business strategy and external factors such as market conditions, competitive environment and taxes and duties, interest and finance charges, working capital margin, regulatory costs, environmental factors and other external factors which may not be within the control of our management. This may entail rescheduling or revising the planned expenditure and funding requirements, including the expenditure for a particular purpose, at the discretion of our management, subject to compliance with applicable law. Moreover, if the actual utilisation towards any of the Objects is lower than the proposed deployment such balance will be used for general corporate purposes to the extent that the total amount to be utilized towards general corporate purposes will not exceed 25% of the gross proceeds from the Issue in accordance with the SEBI ICDR Regulations. In case of a shortfall in raising requisite capital from the Net Proceeds or an increase in the total estimated cost of the Objects, business considerations may require us to explore a range of options including utilising our internal accruals and seeking additional debt from existing and future lenders. We believe that such alternate arrangements would be available to fund any such shortfalls. Further, in case of variations in the actual utilization of funds earmarked for the purposes set forth above, increased fund requirements for a particular purpose may be financed by surplus funds, if any, available in respect of the other purposes for which funds are being raised in the Issue. To the extent our Company is unable to utilise any portion of the Net Proceeds towards the aforementioned objects, per the estimated scheduled of deployment specified above, our Company shall deploy the Net Proceeds in subsequent Fiscals towards the aforementioned Objects.

For further details see “Risk Factor – Risk Factor 46 - Any variation in the utilisation of the Net Proceeds or in the terms of any contract as disclosed in the Draft Prospectus would be subject to certain compliance requirements, including prior shareholders’ approval.” on page 39 of this Draft Prospectus.

The fund requirements mentioned above are based on the internal management estimates of our Company and have not been verified by the Lead Manager or appraised by any bank, financial institution. The fund requirements are based on current circumstances of our business and our Company may have to revise its estimates from time to time on account of various factors beyond its control, such as market conditions, competitive environment, costs of commodities and interest or exchange rate fluctuations. Consequently, the fund requirements of our Company are subject to revisions in the future at the discretion of the management. In the event of any shortfall of funds for the activities proposed to be financed out of the Net Proceeds as stated above, our Company may re-allocate the Net

Proceeds to the activities where such shortfall has arisen, subject to compliance with applicable laws. Further, in case of a shortfall in the Net Proceeds or cost overruns, our management may explore a range of options including utilising our internal accruals or seeking debt financing. For further details see “*Risk Factors – Risk Factor 35 - We have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. Further, we have not identified any alternate source of financing the ‘Objects of the Issue’. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.*” on page 36.

The fund requirements set out for the aforesaid objects of the Issue are proposed to be met entirely from the Net Proceeds and internal accruals. In view of above, we confirm that, with respect to the Objects, our Company is in compliance with Regulation 230(1)(e) of the SEBI ICDR Regulations and we are not required to make firm arrangements of finance through verifiable means towards at least 75% of the stated means of finance, excluding the amount to be raised through the Issue and existing identifiable internal accruals. In case of a shortfall in the Net Proceeds or any increase in the actual utilization of funds earmarked for the Objects, our Company may explore a range of options including utilizing our internal accruals.

Details of Objects of the Issue

1. Prepayment or repayment of all or a portion of loans availed by our Company

Our Company has entered into various financing arrangements from time to time, with various lenders. The financing arrangements availed by our Company include, *inter alia*, unsecured loans, term loans and working capital facilities. For further details, please refer “*Financial Indebtedness*” on page 203.

As at September 30, 2024 our total outstanding borrowings from various lenders (other than loans from related parties) amounted to ₹ 1,163.37 lakhs. Our Company proposes to utilise an estimated amount of up to ₹300 lakhs from the Net Proceeds towards full or partial repayment or pre-payment of certain borrowings, listed below, availed from the lenders by our Company. Pursuant to the terms of the financing arrangements, prepayment of certain borrowings may attract prepayment charges as prescribed by the respective lender. Such prepayment charges, as applicable, will be funded from the internal accruals of our Company.

We believe that such repayment/ pre-payment will help reduce our outstanding indebtedness, debt servicing costs, assist us in maintaining a favourable debt to equity ratio and enable utilisation of our internal accruals for further investment in our business growth and expansion. Additionally, we believe that the leverage capacity of our Company will improve our ability to raise further resources in the future to fund our potential business development opportunities and plans to grow and expand our business.

The following table provides details of loans and facilities as at September 30, 2024, which are proposed to be pre-paid or partly or fully repaid by our Company from the Net Proceeds:

(₹ in Lakhs)

S. No.	Name of Lender	Nature of Borrowings	Interest rate (%) P.A	Repayment Terms	Prepayment penalties, if any	Amount Outstanding as on 30-09-2024	Purpose for which the loan was sanctioned *
1	HDFC Bank Limited	Cash Credit	8.75%	12 months from date of sanction i.e. September 25, 2024	As applicable	1,142.60	Working Capital requirements

Note: The details included in the above table have been certified by M/s. Muchhal & Gupta, Chartered Accountants, Statutory Auditors, our Company, pursuant to their certificate dated November 07, 2024.

* M/s. Muchhal & Gupta, Chartered Accountants, our Statutory Auditors by way of their certificate dated November 07, 2024, have confirmed that the borrowings specified above has been utilized for the purposes availed, as per the sanction letters issued by the respective lenders.

For further details in relation to our borrowings, please see “*Financial Indebtedness*” on page 203.

Payment of additional interest, prepayment penalty or premium, if any, and other related costs shall be made by us out of the internal accruals or out of the Net Proceeds as may be decided by our Company.

Given the nature of the above-mentioned borrowings and the terms of repayment, the aggregate outstanding borrowing amounts which we propose to repay may vary from time to time. However, the aggregate amount to be utilised from the Net Proceeds towards prepayment or repayment of borrowings (including refinanced or additional facilities availed, if any), in part or full, will not exceed ₹ 300 lakhs.

If the actual utilization towards the above object is lower than the proposed deployment, such balance will be used either for funding other objects as mentioned above or towards general corporate purposes to the extent that the total amount to be utilized towards general corporate purposes will not exceed 25% of the Gross Proceeds from the Issue in accordance with the SEBI ICDR Regulations.

2. Funding the working capital requirements of our Company

With the expansion of the business, our company will be in the need of additional working capital requirements. We fund a majority of our working capital requirements in the ordinary course of business from banks facilities and internal accruals. Our Company requires additional working capital for funding its incremental working capital requirements and releasing the internal accruals deployed in working capital. The funding of the incremental working capital requirements will lead to a consequent increase in our profitability, ability to utilize internal accruals for growth opportunities and achieving the proposed targets as per our business plan.

Key assumptions for working capital requirements

Our Company's estimated working capital requirements are based on the following key assumptions:

S. No.	Particulars	Assumptions
Current Assets		
1	Inventories	The Company had Inventories Holding days of 32 days, 14 days and 23 days in FY2022, FY2023 and FY2024. The company expects Inventories Holding days to be around 25 days for FY2025 and FY 2026. With the infusion of fresh funds in working capital, the Company would be able to maintain higher inventories of raw material and finished products leading to faster procurement and execution of orders. During FY2025 and FY2026, the Company intends to manufacture more designs, increase its participation in various exhibitions as well as keep higher inventory of finished goods and expand in new cities and towns. This would require

S. No.	Particulars	Assumptions
		the Company to mainly maintain sufficient levels of inventory of raw materials and finished goods.
2	Trade Receivables	The Company's general credit terms vary across customers. The Company had Debtors Holding days of 18 days, 18 days and 30 days in FY2022, FY2023 and FY2024. The Company expects Debtors Holding days to be around 30 days for FY2025 and FY 2026. Assumptions for accounts receivable are based on expected credit terms and customer payment behavior.
Current Liabilities		
1	Trade Payables	The Company had negligible creditor payment cycle in FY2022, FY2023. Further the Company had Nil creditors as on March 31, 2024. The main raw material of the company is gold and the Company does not get any credit while purchasing gold. Hence, creditor payments days have been considered as Nil for FY2025 and FY2026.

Reason for substantial increase of working capital requirement are mentioned below:-

Our Company, Divine Hira Jewellers Limited, is engaged in the business of designing and marketing of gold jewellery. We mainly deal in 22 Karat gold jewellery, offering a wide variety of designs to suit preferences of the end customer. We have the ability to create localised product design mixes to suit various regional tastes. We cater to our customers' unique preferences, through our understanding of the local and regional market. We provide an extensive range of designs. We are engaged in wholesale of gold jewellery, silver articles, bullions and coins at Mumbai, Maharashtra. Recently we have also curating and offering exquisite antique gold jewelry that transcends time, bringing the charm of historical artistry into the modern era. Currently, we cater to a large number of wholesalers, showrooms and retailers who buy our products in bulk quantities.

We procure the required gold from bullion dealers and importers. Recently we are in the process to start importing gold directly. We do not have our own manufacturing facility and we outsource the work of making jewellery and ornaments to various artisans with whom we have developed relationships. We offer a large variety of handcrafted jewellery, which are designed by our in-house designers in close collaboration with skilled local craftsman located across the country. Due to our diversity of clients and the varied regions each of our clients cater to, we have developed an ability to design our jewellery products as per latest trends, fashion and demographic preference of the end customers. We offer a wide range of products from gold jewellery for special occasions such as weddings and festivals to daily wear jewellery for all ages, genders and across various price points. We cater to a variety of customers across mid-market and value market segments and our products are designed by our in-house team of creative designers and also certain freelance designers, allowing us to manage a large and diverse portfolio of designs.

The Company operates in a working capital intensive industry. The business model is such that it needs to pay up front to procure raw material for jewellery manufacturing and deliver the finished goods to its customers as per the orders received for which payment is processed after an agreed credit period. Moreover, sufficient inventories of raw material and finished goods are to be maintained to support the business growth.

The working capital requirement of the company has increased from ₹ 1,933.92 lakhs in FY2022 to ₹ 2,152.40 lakhs in FY2023. The working capital requirement has further increased to ₹ 2,636.08 lakhs in FY2024. With the focus on increasing profitability margins, the company has significantly reduced in revenue from sale of bullion and silver products as these products were of low margin, and increased its focus on gold jewellery which has higher margins. The revenues from gold jewellery have significantly increased from ₹3,231.42 lakhs in FY2022 to ₹14,608.56 lakhs in FY2024. The company's shift towards gold jewellery, which involves more substantial upfront investments in raw materials and longer receivable cycles, could have contributed to increased working capital needs. Consequently, the company's trade receivables have increased from ₹686.13 lakhs in FY2022 to ₹1,507.69 lakhs in FY2024. This has led to increase in working capital requirement for the past three years.

During FY2024, the total working capital requirement was ₹ 2,636.08 Lakhs. However, this is estimated to increase to ₹ 4,287.65 Lakhs during FY2025 and ₹ 5,700.40 Lakhs during FY2026. The reasons for increase in future working capital requirements of our company are as under:

- Our business operations are working capital intensive. In order to effectively expand our Business arenas and also diversify our operations in various geographical locations, along with the existing facilities we need to have access to a larger amount of liquid funds and sufficient working capital. Our raw materials purchase mainly includes gold bullion which require immediate payment to our suppliers, firstly to avoid fluctuation in gold prices and secondly to maintain relationship with our suppliers for smooth inflow of such raw materials. However, our customers include small and large wholesalers and retailers, to whom we need to give a certain credit period, thus affecting our working capital requirement.
- Our Company's business is a working capital intensive and to address the current issue of limited working capital and achieve exponential growth, the company plans to infuse funds into working capital from the Issue Proceeds. Additionally, the company aims to establish partnerships with new clients by executing orders at higher margins and extending more favourable credit terms. These strategic initiatives are expected to drive future growth.
- Recently we have also started curating and offering exquisite antique gold jewelry that transcends time, bringing the charm of historical artistry into the modern era. We intend to expand the antique gold jewellery segment by targeting new retail showrooms and wholesalers. This would help us in expanding our customer base thus leading to higher revenues and better margins. We feel that there is a lot of potential in this segment. To expand this product line, we would require additional working capital
- Availability of higher working capital would also enable us to explore export opportunities by participating in international exhibitions and establishing relationships with international clients. This would also require additional working capital.

The Company is planning to enter into newer geographies and expand our business. This strategic decision is not just about reaching new markets, it's about solidifying our position in the industry and fostering sustainable growth. By venturing into untapped territories, we aim to unlock fresh opportunities, broaden our customer base, and diversify our revenue streams.

The Company's business is working capital intensive and to address the current issue of limited working capital and achieve exponential growth, the company plans to infuse funds into working capital from the Issue Proceeds. Additionally, the company aims to establish partnerships with new clients by executing orders at higher margins and extending more favorable credit terms.

Recently the company has also started curating and offering antique gold jewelry. The company intends to expand the antique gold jewellery segment by targeting new retail showrooms and wholesalers. This would help the company in expanding its customer base thus leading to higher revenues and better margins. To expand this product line, the company would require additional working capital.

The company also plans to explore export opportunities by participating in international exhibitions and establishing relationships with international clients. This would also require additional working capital.

In order to cater to the sustained higher demand from the domestic and exports market, the Company intends to manufacture more designs, increase its participation in various exhibitions as well as keep higher inventory of finished goods and expand in new cities and towns. This would require the Company to mainly maintain sufficient levels of inventory of raw materials and finished goods and also offer favorable credit period to its clients.

With revenues expected to increase steadily in FY2025 and FY2026, working capital requirements are expected to rise in line with increased sales volumes. Higher sales typically necessitate more significant investments in inventory and accounts receivable. Continued growth in the jewellery segment, which is likely to be a major contributor to revenue, would lead to higher working capital requirements due to increased inventory and receivables.

Thus to meet the market demand, in Financial Years 2025 and 2026, the Company is estimating to have trade receivables at ₹ 2,465.75 lakhs and ₹ 3,287.67 lakhs respectively and inventory ₹ 2,054.79 lakhs and ₹ 2,739.73 lakhs respectively, thereby expanding the working capital requirement.

Further, below mentioned future business strategies as mentioned in the chapter “*Our Business – Business Strategies*” on page 119 of the Draft Prospectus would also lead to increase in working capital requirements:

Strategic Plans for Exports

We plan to export our products in international markets especially Dubai. Dubai has long been a vital center for gold trading, benefiting from earlier free trade policies that bolstered its status as a key hub for both consumption and trading of the precious metal. This strategic position has attracted numerous Indian suppliers, who actively participate in various exhibitions and focus exclusively on B2B (business-to-business) engagements. Their involvement in these trade events helps to strengthen ties and expand their reach within Dubai and the broader Gulf countries, facilitating robust trade relationships and economic growth in the gold sector.

Augment our fund based capacities in order to scale up business operation

Our business operations are working capital intensive. In order to effectively expand our Business arenas and also diversify our operations in various geographical locations, along with the existing facilities we need to have access to a larger amount of liquid funds and sufficient working capital. Our raw materials purchase mainly includes gold bullion which require immediate payment to our suppliers, firstly to avoid fluctuation in gold prices and secondly to maintain relationship with our suppliers for smooth inflow of such raw materials. However, our customers include small and large wholesalers and retailers, to whom we need to give a certain credit period, thus affecting our working capital requirement.

We expect to increase our volumes, revenues and scale of operations and we will require substantial working capital for the same. It is hence our strategy to raise funds from this issue and augment our fund based working capital capabilities. We believe that companies with high liquidity on their balance sheet would be able to better exploit market opportunities in short term as well as longer duration services in our business. Our Company may also explore possibilities for utilising the available capital to increase physical presence by setting-up sales offices in various regions in India in the future. For further details regarding the working capital being raised through this Issue, please refer to section “Objects of the Issue” on page no. 71 of the Draft Prospectus.

Focus on expanding our product and brand portfolio to cater to existing portfolio gaps and increase our consumer reach

Our marketing personnel regularly participate in exhibitions and trade fairs where they come across various new designs. These designs are forwarded to our in-house designers who improve upon it according to latest trends and requirements. Our in-house designers also come up with their own designs and ideas which are showcased to our regular customers. The customers in the jewellery world are discerning, knowledgeable and demanding. We bring innovative ideas and designs to our customers on a regular basis. Our Company intends to continue to add new designs to our jewellery portfolio by regularly participating in exhibitions and trade fairs.

Recently we have also curating and offering exquisite antique gold jewelry that transcends time, bringing the charm of historical artistry into the modern era. We intend to expand the antique gold jewellery segment by targeting new retail showrooms and wholesalers. This would help us in expanding our customer base thus leading to higher revenues and better margins.

Continue to focus on our existing customers

We believe that we have established ourselves in the domestic market and have developed a marketing network with major retail chains during the past few years. SECTION IV – ABOUT THE COMPANY

INDUSTRY OVERVIEW

Global macro-economic outlook

Global growth is projected at 3.1 percent in 2024 and 3.2 percent in 2025, with the 2024 forecast 0.2 percentage point higher than that in the October 2023 World Economic Outlook (WEO) on account of greater-than-expected resilience in the United States and several large emerging market and developing economies, as well as fiscal support in China. The forecast for 2024–25 is, however, below the historical (2000–19) average of 3.8 percent, with elevated central bank policy rates to fight inflation, a withdrawal of fiscal support amid high debt weighing on economic activity, and low underlying productivity growth. Inflation is falling faster than expected in most regions, in the midst of unwinding supply-side issues and restrictive monetary policy. Global headline inflation is expected to fall to 5.8 percent in 2024 and to 4.4 percent in 2025, with the 2025 forecast revised down.

With disinflation and steady growth, the likelihood of a hard landing has receded, and risks to global growth are broadly balanced. On the upside, faster disinflation could lead to further easing of financial conditions. Looser fiscal policy than necessary and then assumed in the projections could imply temporarily higher growth, but at the risk of a more costly adjustment later on. Stronger structural reform momentum could bolster productivity with positive cross-border spillovers. On the downside, new commodity price spikes from geopolitical shocks—including continued attacks in the Red Sea—and supply disruptions or more persistent underlying inflation could prolong tight monetary conditions. Deepening property sector woes in China or, elsewhere, a disruptive turn to tax hikes and spending cuts could also cause growth disappointments.

Policymakers' near-term challenge is to successfully manage the final descent of inflation to target, calibrating monetary policy in response to underlying inflation dynamics and—where wage and price pressures are clearly dissipating—adjusting to a less restrictive stance. At the same time, in many cases, with inflation declining and economies better able to absorb effects of fiscal tightening, a renewed focus on fiscal consolidation to rebuild budgetary capacity to deal with future shocks, raise revenue for new spending priorities, and curb the rise of public debt is needed. Targeted and carefully sequenced structural reforms would reinforce productivity growth and debt sustainability and accelerate convergence toward higher income levels. More efficient multilateral coordination is needed for, among other things, debt resolution, to avoid debt distress and create space for necessary investments, as well as to mitigate the effects of climate change.

1/ Difference based on rounded figures for the current and October 2023 WEO forecasts.

2/ Data and forecasts are presented on a fiscal year basis.

The Outlook

The global economic recovery from the COVID-19 pandemic, Russia's invasion of Ukraine, and the cost-of-living crisis is proving surprisingly resilient. Inflation is falling faster than expected from its 2022 peak, with a smaller-than-expected toll on employment and activity, reflecting favorable supply-side developments and tightening by central banks, which has kept inflation expectations anchored. At the same time, high interest rates aimed at fighting inflation and a withdrawal of fiscal support amid high debt are expected to weigh on growth in 2024.

Growth resilient in major economies. Economic growth is estimated to have been stronger than expected in the second half of 2023 in the United States, and several major emerging market and developing economies. In several cases, government and private spending contributed to the upswing, with real disposable income gains supporting consumption amid still-tight—though easing—labor markets and households drawing down on their accumulated

pandemic-era savings. A supply-side expansion also took hold, with a broad-based increase in labor force participation, resolution of pandemic-era supply chain problems, and declining delivery times. The rising momentum was not felt everywhere, with notably subdued growth in the euro area, reflecting weak consumer sentiment, the lingering effects of high energy prices, and weakness in interest-rate-sensitive manufacturing and business investment. Low-income economies continue to experience large output losses compared with their prepandemic (2017–19) paths amid elevated borrowing costs.

Inflation subsiding faster than expected. Amid favorable global supply developments, inflation has been falling faster than expected, with recent monthly readings near the prepandemic average for both headline and underlying (core) inflation (Figure 1). Global headline inflation in the fourth quarter of 2023 is estimated to have been about 0.3 percentage point lower than predicted in the October 2023 WEO on a quarter-over-quarter seasonally adjusted basis. Diminished inflation reflects the fading of relative price shocks— notably those to energy prices—and their associated pass-through to core inflation.¹ The decline also reflects an easing in labor market tightness, with a decline in job vacancies, a modest rise in unemployment, and greater labor supply, in some cases associated with a strong inflow of immigrants. Wage growth has generally remained contained, with wage-price spirals—in which prices and wages accelerate together—not taking hold. Near-term inflation expectations have fallen in major economies, with long-term expectations remaining anchored.

Figure 1. Global Inflation: Rise and Fall
(Month-over-month annualized percent change, seasonally adjusted)

Sources: Haver Analytics; and IMF staff calculations.

Note: The figure plots the median of a sample of 57 economies that accounts for 78 percent of *World Economic Outlook* world GDP (in weighted purchasing-power-parity terms) in 2023. Vertical axes are cut off at -4 percent and 16 percent. The bands depict the 10th to 90th percentiles of inflation across economies. "Core inflation" is the percent change in the consumer price index for goods and services, excluding food and energy (or the closest available measure). AEs = advanced economies; EMDEs = emerging market and developing economies.

High borrowing costs cooling demand. To reduce inflation, major central banks raised policy interest rates to restrictive levels in 2023, resulting in high mortgage costs, challenges for firms refinancing their debt, tighter credit availability, and weaker business and residential investment. Commercial real estate has been especially under pressure, with higher borrowing costs compounding post pandemic structural changes. But with inflation easing, market expectations that future policy rates will decline have contributed to a reduction in longer-term interest rates and rising equity markets (Box 1). Still, long-term borrowing costs remain high in both advanced and emerging market and developing economies, partly because government debt has been rising. In addition, central banks' policy rate decisions are becoming increasingly asynchronous. In some countries with falling inflation—including Brazil and Chile, where central banks tightened policy earlier than in other countries—interest rates have been declining since the second half of 2023. In China, where inflation has been near zero, the central bank has eased monetary policy. The Bank of Japan has kept short-term interest rates near zero.

Fiscal policy amplifying economic divergences. Governments in advanced economies eased fiscal policy in 2023. The United States, where GDP had already exceeded its pre-pandemic path, eased policy more than did euro area and other economies in which the recovery was incomplete. In emerging market and developing economies, in which output has on average fallen even further below the pre-pandemic trend, on average the fiscal stance is estimated to have been neutral. The exceptions include Brazil and Russia, where fiscal policy eased in 2023. In low-income countries, liquidity squeezes and the elevated cost of interest payments—averaging 13 percent of general government revenues, about double the level 15 years ago—crowded out necessary investments, hampering the recovery of large output losses compared with pre-pandemic trends. In 2024, the fiscal policy stance is expected to tighten in several advanced and emerging market and developing economies to rebuild budgetary room for maneuver and curb the rising path of debt, and this shift is expected to slow growth in the near term.

The Forecast

Global growth, estimated at 3.1 percent in 2023, is projected to remain at 3.1 percent in 2024 before rising modestly to 3.2 percent in 2025 (Table 1). Compared with that in the October 2023 WEO, the forecast for 2024 is about 0.2 percentage point higher, reflecting upgrades for China, the United States, and large emerging market and developing economies. Nevertheless, the projection for global growth in 2024 and 2025 is below the historical (2000–19) annual average of 3.8 percent, reflecting restrictive monetary policies and withdrawal of fiscal support, as well as low underlying productivity growth. Advanced economies are expected to see growth decline slightly in 2024 before rising in 2025, with a recovery in the euro area from low growth in 2023 and a moderation of growth in the United States. Emerging market and developing economies are expected to experience stable growth through 2024 and 2025, with regional differences.

World trade growth is projected at 3.3 percent in 2024 and 3.6 percent in 2025, below its historical average growth rate of 4.9 percent. Rising trade distortions and geoeconomic fragmentation are expected to continue to weigh on the level of global trade. Countries imposed about 3,200 new restrictions on trade in 2022 and about 3,000 in 2023, up from about 1,100 in 2019, according to Global Trade Alert data.

These forecasts are based on assumptions that fuel and nonfuel commodity prices will decline in 2024 and 2025 and that interest rates will decline in major economies. Annual average oil prices are projected to fall by about 2.3 percent in 2024, whereas nonfuel commodity prices are expected to fall by 0.9 percent. IMF staff projections are for policy rates to remain at current levels for the Federal Reserve, the European Central Bank, and the Bank of England until the second half of 2024, before gradually declining as inflation moves closer to targets. The Bank of Japan is projected to maintain an overall accommodative stance.

For advanced economies, growth is projected to decline slightly from 1.6 percent in 2023 to 1.5 percent in 2024 before rising to 1.8 percent in 2025. An upward revision of 0.1 percentage point for 2024 reflects stronger-than-expected US growth, partly offset by weaker-than-expected growth in the euro area.

- In the United States, growth is projected to fall from 2.5 percent in 2023 to 2.1 percent in 2024 and 1.7 percent in 2025, with the lagged effects of monetary policy tightening, gradual fiscal tightening, and a softening in labor markets slowing aggregate demand. For 2024, an upward revision of 0.6 percentage point since the October 2023 WEO largely reflects statistical carryover effects from the stronger-than-expected growth outcome for 2023.
- Growth in the euro area is projected to recover from its low rate of an estimated 0.5 percent in 2023, which reflected relatively high exposure to the war in Ukraine, to 0.9 percent in 2024 and 1.7 percent in 2025. Stronger household consumption as the effects of the shock to energy prices subside and inflation falls, supporting real income growth, is expected to drive the recovery. Compared with the October 2023 WEO forecast, however, growth is revised downward by 0.3 percentage point for 2024, largely on account of carryover from the weaker- than-expected outcome for 2023.
- Among other advanced economies, growth in the United Kingdom is projected to rise modestly, from an estimated 0.5 percent in 2023 to 0.6 percent in 2024, as the lagged negative effects of high energy prices wane, then to 1.6 percent in 2025, as disinflation allows an easing in financial conditions and permits real incomes to recover. The markdown to growth in 2025 of 0.4 percentage point reflects reduced scope for growth to catch up in light of recent upward statistical revisions to the level of output through the pandemic period. Output in Japan is projected to remain above potential as growth decelerates from an estimated 1.9 percent in 2023 to 0.9 percent in 2024 and 0.8 percent in 2025, reflecting the fading of one-off factors that supported activity in 2023, including a depreciated yen, pent-up demand, and a recovery in business investment following earlier delays in implementing projects.

In emerging market and developing economies, growth is expected to remain at 4.1 percent in 2024 and to rise to 4.2 percent in 2025. An upward revision of 0.1 percentage point for 2024 since October 2023 reflects upgrades for several regions.

- Growth in emerging and developing Asia is expected to decline from an estimated 5.4 percent in 2023 to 5.2 percent in 2024 and 4.8 percent in 2025, with an upgrade of 0.4 percentage point for 2024 over the October 2023 projections, attributable to China's economy. Growth in China is projected at 4.6 percent in 2024 and 4.1 percent in 2025, with an upward revision of 0.4 percentage point for 2024 since the October 2023 WEO. The upgrade reflects carryover from stronger-than- expected growth in 2023 and increased government spending on capacity building against natural disasters. Growth in India is projected to remain strong at 6.5 percent in both 2024 and 2025, with an upgrade from October of 0.2 percentage point for both years, reflecting resilience in domestic demand.
- Growth in emerging and developing Europe is projected to pick up from an estimated 2.7 percent in 2023 to 2.8 percent in 2024, before declining to 2.5 percent in 2025. The forecast upgrade for 2024 of 0.6 percentage point over October 2023 projections is attributable to Russia's economy. Growth in Russia is projected at 2.6 percent in 2024 and 1.1 percent in 2025, with an upward revision of 1.5 percentage points over the October 2023 figure for 2024, reflecting carryover from stronger-than-expected growth in 2023 on account of high military spending and private consumption, supported by wage growth in a tight labor market.
- In Latin America and the Caribbean, growth is projected to decline from an estimated 2.5 percent in 2023 to 1.9 percent in 2024 before rising to 2.5 percent in 2025, with a downward revision for 2024 of 0.4 percentage point compared with the October 2023 WEO projection. The forecast revision for 2024 reflects negative growth in Argentina in the context of a significant policy adjustment to restore macroeconomic stability. Among other major economies in the region, there are upgrades of 0.2 percentage point for Brazil and 0.6 percentage point for Mexico, largely due to carryover effects from stronger-than-expected domestic demand and higher-than-expected growth in large trading-partner economies in 2023.
- Growth in the Middle East and Central Asia is projected to rise from an estimated 2.0 percent in 2023 to 2.9 percent in 2024 and 4.2 percent in 2025, with a downward revision of 0.5 percentage point for 2024 and an upward revision of 0.3 percentage point for 2025 from the October 2023 projections. The revisions are mainly attributable to Saudi Arabia and reflect temporarily lower oil production in 2024, including from unilateral cuts and cuts in line with an agreement through OPEC+ (the Organization of the Petroleum

Exporting Countries, including Russia and other non- OPEC oil exporters), whereas non-oil growth is expected to remain robust.

- In sub-Saharan Africa, growth is projected to rise from an estimated 3.3 percent in 2023 to 3.8 percent in 2024 and 4.1 percent in 2025, as the negative effects of earlier weather shocks subside and supply issues gradually improve. The downward revision for 2024 of 0.2 percentage point from October 2023 mainly reflects a weaker projection for South Africa on account of increasing logistical constraints, including those in the transportation sector, on economic activity.

Inflation Outlook

Global headline inflation is expected to fall from an estimated 6.8 percent in 2023 (annual average) to 5.8 percent in 2024 and 4.4 percent in 2025. The global forecast is unrevised for 2024 compared with October 2023 projections and revised down by 0.2 percentage point for 2025. Advanced economies are expected to see faster disinflation, with inflation falling by 2.0 percentage points in 2024 to 2.6 percent, than are emerging market and developing economies, where inflation is projected to decline by just 0.3 percentage point to 8.1 percent. The forecast is revised down for both 2024 and 2025 for advanced economies, while it is revised up for 2024 for emerging market and developing economies, mainly on account of Argentina where the realignment of relative prices and elimination of legacy price controls, past currency depreciation, and the related pass-through into prices is expected to increase inflation in the near term. The drivers of declining inflation differ by country but generally reflect lower core inflation as a result of still-tight monetary policies, a related softening in labor markets, and pass-through effects from earlier and ongoing declines in relative energy prices.

Overall, about 80 percent of the world's economies are expected to see lower annual average headline and core inflation in 2024. Among economies with an inflation target, headline inflation is projected to be 0.6 percentage point above target for the median economy by the fourth quarter of 2024, down from an estimated gap of 1.7 percentage points at the end of 2023. Most of these economies are expected to reach their targets (or target range midpoints) by 2025. In several major economies, the downward revision to the projected path of inflation, combined with a modest upgrade to economic activity, implies a softer-than-expected landing.

Indian Economy

Strong economic growth in the first quarter of FY23 helped India overcome the UK to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. India's gross domestic product (GDP) at current prices in the second quarter (Q2) of 2023-24 is estimated to be Rs. 71.66 trillion (US\$ 861.2 billion), as against Rs. 65.67 trillion (US\$ 789.2 billion) in Q2 of 2022-23, showing a growth rate of 9.1%. Strong domestic demand for consumption and investment, along with Government's continued emphasis on capital expenditure are seen as among the key driver of the GDP in the first half of FY24. In 2023-24 (April-December), India's service exports stood at US\$ 247.92 billion. Furthermore, India's overall exports (services and merchandise) in 2023-24 (April-December) were estimated at US\$ 565.04 billion. Rising employment and substantially increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalization of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers. The contact-based services sector has largely demonstrated promise to boost growth by unleashing the pent-up demand. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships. India's appeal as a destination for investments has grown stronger and more sustainable as a result of the current period of global unpredictability and volatility, and the record amounts of money raised by India-focused funds in 2022 are evidence of investor faith in the "Invest in India" narrative.

Macroeconomic overview of India

India's real GDP is estimated to grow at an average of 7.9% between FY22 and FY24. The share of manufacturing in total Gross Value Added (GVA), in volume terms, increased from 17.2 % in FY14 to 18.4 % in FY18 under the impact of the Make in India mission of the government. Based on the advance estimates released recently, the share has stayed robust at 17.7 % in FY24 on the back of the Production Linked Incentive (PLI) schemes rolled out by the government.

Review of Private Final Consumption Expenditure in GDP

The share of Private Final Consumption Expenditure (PFCE) in GDP at current prices increased from an average of 58.4% in the eight years preceding the onset of the pandemic to 60.8% in the last 3 years ending FY24.

Source: NSO, MoSPI

Note: RE stands for Revised Estimates, PE for Provisional Estimates and FAE for First Advance Estimates

Private Final Consumption Expenditure has consequently emerged as a major growth driver post-Covid pandemic, playing a pivotal role in sustaining the economy amid external challenges brought in by geopolitical shocks, monetary tightening, and sluggish global demand. As PFCE is also contributing to the reinvigoration of private capital investment, it has lent resilience to the domestic demand in the Indian economy. This has aided India to emerge as the fastest-growing major economy in the past few years.

Enabling investment-led economic growth

The investment climate in the country has transformed in recent years, leading to the emergence of ‘investment’ as a crucial driver of economic growth. The seemingly impressive investment rate in the first decade of the millennium was based on excessive borrowing and over-optimism, which eventually proved unsustainable. In the second decade, banks were reluctant to lend to corporates, and the corporates, in turn, had to trim their balance sheets by selling assets and paying-off debts. Hence, the investment share of GDP came down in the second decade.

Note: Investment Rate is the ratio of Nominal GFCF over Nominal GDP

Data for FY24 is as per the First Advance Estimates

Source: NSO, MoSPI

These stresses on the balance sheets, which accumulated in the first decade, compounded the underlying macro fragility of the Indian economy with a high fiscal deficit, high current account deficit and sustained double-digit inflation, and the Indian economy was included in the infamous club of ‘fragile-five’ emerging economies. The

government helped banks strengthen their balance sheets by recapitalizing them and restructuring the industry. With stronger balance sheets in the non-financial corporate and banking sectors, growth in investments and credit are poised to increase in this decade.

Source: RBI

The government’s effort over the past decade have resulted in positive economic outcomes. With numerous investment-boosting reforms and healthier balance sheets, private corporate investment has begun to crowd in, and banks are responding with greater credit disbursement. The non-food bank credit growth, net of personal loans, which had declined from 20% in 2008 to less than 10% in FY 2016, has rebounded to reach 13% in FY23.

Credit Cycle Growth

Bank credit, in recent years, has shown phenomenal growth, outpacing the growth in deposits on the back of sustained demand momentum and robust economic recovery after the Covid-19 pandemic. The growth in non-food bank credit at 15% in FY23 was the highest in the last 10 years. This would not have been possible without a significant improvement in the banking sector’s health. Even as credit growth surged, asset quality across all SCB groups kept improving, with GNPA (gross non-performing assets) and Net NPAs relative to the total advances dropping to a multi-year low in September, 2023.

Source: RBI

The improvement in the banking sector’s health is striking when compared to the lows it had sunk to following the developments in the first decade of the millennium. Relative to gross advances, the GNPA of SCBs (Scheduled Commercial Banks) rose almost five-fold from 2.2% in FY11 to 11.2% in FY 18 in the above chart, as loans extended in boom years of 2003-08 and again between 2012 and 2014 turned sour.

Safeguarding Macroeconomic stability

Macroeconomic stability built on an economic environment with strong output growth, price stability, and robust external account are important goals of the government and the Reserve Bank of India. Considering the multiple challenges, the government of India has committed to an institutional architecture that fosters macro stability.

*Gross fiscal deficit data for FY23 is a Revised Estimate, and for FY24 is a Budget Estimate, Current Account Deficit data for FY24 is up to H1 (April-September)

Post-pandemic, FY22 saw a revival of the economy, with growth gaining momentum and inflation coming down. However, by the end of FY22, the global economic development worsened yet again with the escalation of geopolitical conflicts and accompanying sanctions. Global commodity prices shot up substantially across the board amidst heightened volatility, and crude oil prices jumped to a 10-year high in June 2022. This spurred inflation globally, which affected India's external account and price situation. Thus, the beginning of FY23 presented fresh, multi-frontal challenges to keeping macro vulnerabilities in check. However, India managed to keep its retail inflation below the levels of several other countries.

Inflationary pressures moderated in FY24 (April-December), with average retail inflation easing to 5.5 %. The decline was driven by benign trends in core (non-food, non-fuel) inflation, which gradually declined to a 49-month low of 3.8% in December, 2023. The overall inflation is now stable and within the notified tolerance band of 2 to 6 %.

Overview of Gems and Jewellery Industry

In the fiscal year 2023-24, India experienced a significant decline in its gems and jewellery exports by 14.94%, amounting to US\$32.02 billion compared to US\$37.6 billion in the previous year. The gem and jewellery sector saw a decline of 12.17% in rupee terms and 14.94% in dollar terms, totaling Rs. 265187.95 crore and US\$32.02 billion, respectively. Import figures also reflected a decrease, with a decline of 11.09% in rupee terms and 13.84% in dollar

terms, amounting to Rs. 184355.48 crores and \$22.26 billion, respectively. The export of cut and polished diamonds significantly dropped by 27.58%, totaling \$15.96 billion, while imports showed a substantial growth of 46.12%, reaching \$1911.0 million. Conversely, gold jewellery exports exhibited a positive growth rate of 16.97%, amounting to \$11140.780 million, attributed partly to increased exports facilitated by free trade agreements with UAE and Australia. Silver jewellery exports experienced a notable decline of 45%, while platinum jewellery exports surged by 449.52%. Coloured gemstone exports demonstrated a growth rate of 13.94%, reaching \$478.68 million.

Reasons for Export Decline

- **Market Demand:** Weak demand in key markets like the United States and West Asia, due to geopolitical tensions and economic conditions, contributed to the decline.
- **Supply Disruption:** Sanctions on Russia impacted the supply of raw diamonds, affecting the export of cut and polished diamonds from India.
- **Increase in Gold Jewellery Exports:** The positive growth in gold jewellery exports was fueled by favorable trade agreements with UAE and Australia, resulting in significant export growth to these regions.

Road Ahead

- In the coming years, growth in the gems and jewellery sector would largely be contributed by the development of large retailers/brands. Established brands are guiding the organised market and are opening opportunities to grow. Increasing penetration of organised players provides variety in terms of products and designs. Also, the relaxation of restrictions on gold import is likely to provide a fillip to the industry.
- The improvement in availability along with the reintroduction of low-cost gold metal loans and likely stabilisation of gold prices at lower levels is also expected to drive volume growth for jewellers over the short to medium term. India has 450 organised jewellery manufacturers, importers & exporters and is the hub for jewellery manufacturing. These players have benefited greatly due to the increasing liberal policies by the government. The demand for jewellery is expected to be significantly supported by the recent positive developments in the industry. India's gems and jewellery industry is expected to reach US\$ 100 billion by 2027.

This strategic position has attracted numerous Indian suppliers, who actively participate in various exhibitions and focus exclusively on B2B (business-to-business) engagements. Their involvement in these trade events helps to strengthen ties and expand their reach within Dubai and the broader Gulf countries, facilitating robust trade relationships and economic growth in the gold sector.

Augment our fund based capacities in order to scale up business operation

Our business operations are working capital intensive. In order to effectively expand our Business arenas and also diversify our operations in various geographical locations, along with the existing facilities we need to have access to a larger amount of liquid funds and sufficient working capital. However, our customers include small and large wholesalers and retailers, to whom we need to give a certain credit period, thus affecting our working capital requirement.

We expect to increase our volumes, revenues and scale of operations and we will require substantial working capital for the same. It is hence our strategy to raise funds from this issue and augment our fund based working capital capabilities. We believe that companies with high liquidity on their balance sheet would be able to better exploit market opportunities in short term as well as longer duration services in our business. Our Company may also explore possibilities for utilising the available capital to increase physical presence by setting-up sales offices in various regions in India in the future. For further details regarding the working capital being raised through this Issue, please refer to section “Objects of the Issue” on page no. 71 of the Draft Prospectus.

RAW MATERIAL

Our Company is mainly engaged in the manufacture and sale of gold jewellery in various designs and styles. This standard Gold Bullion is our primary raw material and is purchased in bulk from various bullion traders.

We also use ancillary raw materials like Silver, different mixes of Alloy, American Diamonds and various Coloured Stones. Silver is mainly used to create a basic sample of each jewellery design created by our designing team. This sample is used for display to our customers and also to ascertain the actual look, style and viability of the design before making the final gold jewellery of that design. Alloy is used in small quantities, mainly for the purpose of mixing with gold so as to convert 24 karat gold into 22 karat gold, thus giving the gold jewellery a sturdier make.

Under the provisions of the Trademarks Act, an application for trademark registration may be made before the Trademark Registry by any person claiming to be the proprietor of a trade mark, whether individual or joint applicants, and can be made on the basis of either actual use or intention to use a trademark in the future. While copyright registration is not a prerequisite for acquiring or enforcing a copyright in an otherwise copyrightable work, registration under the Copyright Act acts as prima facie evidence of the particulars entered therein and may help expedite infringement proceedings and reduce delay caused due to evidentiary considerations. Upon registration, the copyright protection for a work exists for a period of 60 years following the demise of the author. Reproduction of a copyrighted work for

Industries (Development and Regulation) Act, 1951

The Industries (Development and Regulation) Act, 1951 (the “Act”) governs the development and regulation of industries in India, and its main objective is to empower the Government to: (i) take necessary steps for the development of industries; (ii) regulate the pattern and direction of industrial development; and (iii) control the activities, performance and results of industrial undertakings in public interest. The Act is applicable to the ‘Scheduled Industries’ which have been listed down in the first schedule of the Act and small-scale industrial undertakings and ancillary units are exempted from the provisions of the Act. The Act regulated the industries by requiring them to obtain industrial licensing by filing an Industrial Entrepreneur Memoranda with the Secretariat of Industrial Assistance, Department of Industrial Policy and Promotion. This Act is administered by the Ministry of Industries and Commerce through its Department of Industrial Policy & Promotion. This department is responsible for the formulation and implementation of promotional and developmental measures for growth of the industrial sector and also monitors the industrial growth and production, in general, and selected industrial sectors. In addition to above, we are subject to a wide variety of generally applicable labour laws concerning condition of working, benefit and welfare of our labourers and employees such as the Sexual Harassment of Women at Workplace (Prevention, Prohibition and Redressal) Act, 2013 and the Employees’ (Provident Fund and Miscellaneous Provision) Act, 1952.

Industrial Employment (Standing Orders) Act, 1946

In order to strengthen the bargaining powers of the workers this act is enacted, it requires the employers to formally define the working conditions to the employee. As per this act, an employer is required to submit five copies of standing orders required by him for adoption of his industrial establishment. An employer failing to submit the draft standing orders as required by this act shall be liable to pay fine as per section 13 of this act.

Contract Labour (Regulation and Abolition) Act, 1970, as amended (the “CLRA Act”)

The CLRA Act requires the principal employer of an establishment in which twenty or more workmen are employed or were employed on any day of the preceding twelve months as contract labour, to make an application to the concerned officer for registration of the establishment. In the absence of registration, contract labour cannot be employed in the establishment. Likewise, every contractor who employs or who employed on any day of the preceding twelve months twenty or more workmen, is required to obtain a license and not to undertake or execute any work through contract labour except under and in accordance with the license issued. The CLRA Act imposes certain obligations on the contractor in relation to establishment of canteens, rest rooms, drinking water, washing facilities, first aid, other facilities and payment of wages. However, in the event the contractor fails to provide these amenities, the principal employer is under an obligation to provide these facilities within a prescribed time period. Penalties, including both fines and imprisonment, may be levied for contravention of the provisions of the CLRA Act.

Employees Provident Fund and Miscellaneous Provisions Act, 1952 (“Act”) and the schemes formulated there under (“Schemes”)

The Central Government shall also contribute at the rate of 1.16 per cent of the pay of the members of the Employees’ Pension Scheme and credit the contribution to the Employees’ Pension Fund.

FACTORS AFFECTING OUR RESULTS OF OPERATIONS

Our business is subjected to various risks and uncertainties, including those discussed in the section titled “Risk Factor” beginning on page 23 of this Draft Prospectus. Our results of operations and financial conditions are affected by numerous factors including the following:

- Substantial portion of our revenues are dependent on few customers and the loss of, or a significant reduction in purchases by any one or more such customers could adversely affect our financial performance
- Our dependence on few suppliers puts us at risk of interruptions in the availability of raw materials, which could adversely affect our business, financial condition and results of operations. Further, we have not entered into any long-term agreements with our suppliers for raw materials and accordingly may not be able to enjoy credit and other facilities provided by our existing suppliers.
- We may be unable to obtain, renew or maintain statutory and regulatory permits, licenses and approvals required to operate our business which could result in an adverse effect on our results of operations. We require certain statutory and regulatory permits, licenses and approvals for our business.
- The non-availability or high cost of quality gold bullion and coloured stones may have an adverse effect on our business, results of operations and financial condition.
- Our income and sales are subject to seasonal fluctuations and lower income in a peak season may have a disproportionate effect on our results of operations.

PHASED IMPLEMENTATION OF UPI FOR BIDS BY RETAIL INDIVIDUAL BIDDERS AS PER THE UPI CIRCULAR

SEBI has issued UPI Circulars in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by RIIs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to upto three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circulars proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

- a) Phase I: This phase was applicable from January 01, 2019 and lasted till June 30, 2019. Under this phase, a Retail Individual Bidder, besides the modes of Bidding available prior to the UPI Circulars, also had the option to submit the Bid cum Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.
- b) Phase II: This phase has commenced with effect from July 01, 2019 and will continue for a period of three months or floating of five main board public issues, whichever is later. Under this phase, submission of the Bid cum Application Form by a Retail Individual Investor through intermediaries to SCSBs for blocking of funds has been discontinued and has been replaced by the UPI Mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase. SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 extended the timeline for implementation of UPI Phase II till further notice.
- c) Phase III/T+3: This phase has become applicable on a voluntary basis for all issues opening on or after September 1, 2023 and on a mandatory basis for all issues opening on or after December 1, 2023 vide T+3 Press Release. In this phase, the time duration from public issue closure to listing has been reduced to three Working Days. The Issue shall be undertaken pursuant to the processes and procedures as notified in the T+3 Press Release as applicable, subject to any circulars, clarification or notification issued by SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

Pursuant to the UPI Circular, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to

send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked not later than one day from the date on which the Basis of Allotment is finalized. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors complaints in this regard, the relevant SCSB as well as the post – Issue BRLM will be required to compensate the concerned investor.

MULTIPLE APPLICATIONS

An Applicant should submit only one Application (and not more than one). Two or more Applications will be deemed to be multiple Applications if the sole or First Applicant is one and the same.

In this regard, the procedures which would be followed by the Registrar to the Issue to detect multiple applications are given below:

- I. All applications are electronically strung on first name, address (1st line) and applicant's status. Further, these applications are electronically matched for common first name and address and if matched, these are checked manually for age, signature and father/ husband's name to determine if they are multiple applications

- III. Applications which do not qualify as multiple applications as per above procedure are further checked for common PAN. All such matched applications with common PAN are manually checked to eliminate possibility of data capture error to determine if they are multiple applications.

In case of a mutual fund, a separate Application can be made in respect of each scheme of the mutual fund registered with SEBI and such Applications in respect of more than one scheme of the mutual fund will not be treated as multiple Applications provided that the Applications clearly indicate the scheme concerned for which the Application has been made.

In cases where there are more than 20 (Twenty) valid applications having a common address, such shares will be kept in abeyance, post allotment and released on confirmation of "know your client" norms by the depositories. The Company reserves the right to reject, in its absolute discretion, all or any multiple Applications in any or all categories.

After submitting an ASBA Application or Application through UPI Mechanism either in physical or electronic mode, an Applicant cannot apply (either in physical or electronic mode) to either the same or another Designated Branch of the SCSB. Submission of a second Application in such manner will be deemed a multiple Application and would be rejected.

ALLOTMENT PROCEDURE AND BASIS OF ALLOTMENT

The allotment of Equity Shares to Bidders other than Retail Individual Investors may be on proportionate basis. No Retail Individual Investor will be allotted less than the minimum Bid Lot subject to availability of shares in Retail Individual Investor Category and the remaining available shares, if any will be allotted on a proportionate basis. The Issue was 100% underwritten.

Flow of Events from the closure of Bidding period (T DAY) Till Allotment:

- On T Day, RTA to validate the electronic bid details with the depository records and also reconcile the final certificates received from the Sponsor Bank for UPI process and the SCSBs for ASBA and Syndicate ASBA process with the electronic bid details
- RTA identifies cases with mismatch of account number as per bid file / FC and as per applicant's bank account linked to depository demat account and seek clarification from SCSB to identify the applications with third party account for rejection.
- Third party confirmation of applications to be completed by SCSBs on T+1 day.
- RTA prepares the list of final rejections and circulate the rejections list with BRLM(s)/ Company for their review/ comments.
- Post rejection, the RTA submits the basis of allotment with the Designated Stock Exchange (DSE).
- The DSE, post verification approves the basis and generates drawal of lots wherever applicable, through a random number generation software.
- The RTA uploads the drawal numbers in their system and generates the final list of allottees as per process mentioned below.

Process for generating list of Allottees:

- Instruction is given by RTA in their Software System to reverse category wise all the application numbers in the ascending order and generate the bucket /batch as per the allotment ratio. For example, if the application number is 78654321 then system reverses it to 12345687 and if the ratio of allottees to applicants in a category is 2:7 then the system will create lots of 7. If the drawal of lots provided by Designated Stock Exchange (DSE) is 3 and 5 then the system will pick every 3rd and 5th application in each of the lot of the category and these applications will be allotted the shares in that category.
- In categories where there is proportionate allotment, the Registrar will prepare the proportionate working based on the oversubscription times.
- In categories where there is undersubscription, the Registrar will do full allotment for all valid applications.
